Results:

0-2: You are on the right track to preventing heart disease. Exercise, eating right and avoiding cigarettes can help prevent 80 percent of heart disease.

3-7: One or two harmful habits can increase your chances of developing heart disease. Simply knowing your risk factors is also important to reducing your risk, especially if you need to reduce your cholesterol or blood pressure.

8 or higher: Get to the doctor! Make the commitment to one healthy behavior change, such as exercising or quitting smoking.
