

EIS CloudCore Overview

Accelerate your business. Make the shift to SaaS.

Chances are your company already uses Software-as-a-Service for business activities like collaboration, CRM, and financial management. SaaS is simply a deployment method in which you access an application online through a subscription rather than licensing and installing it in your own data center.

SaaS offers many benefits over traditional software delivery models. Until recently, though, it has not been widely available for deploying the systems that administer quotes, policies, billing, claims, and other insurance core systems.

Unlike cloud-hosted “modern legacy” insurance systems, EIS CloudCore is a truly cloud-native, API-first insurance platform that makes the benefits of SaaS a reality for insurers in any line of business. EIS CloudCore allows insurers to take full advantage of the cloud to innovate and operate like a tech company: fast, simple, agile.

IT departments spend **73%** of their existing budget for the maintenance of on-premises and cloud-hosted systems.

EIS takes care of it all

EIS CloudCore offloads resource-intensive activities from your IT department. By handling the following underlying tech burdens for you, EIS enables your teams to focus on business innovation, delivering value to customers, and creating the future of insurance.

APPLICATION UPDATES

MANAGEMENT

SECURITY

MAINTENANCE

COMPLIANCE

SLAS

CI/CD AUTOMATION

MONITORING

CERTIFICATION

SUPPORT

BREAK/FIX

HOSTING

Lead with speed. Run on EIS CloudCore.

EIS is the SaaS insurance platform that frees you to rapidly transform your business and offer innovative personalized products and customer experiences — giving you a speed and agility advantage over emerging and established competitors.

► BUSINESS BENEFITS

Go live sooner

Cloud-native SaaS platforms accelerate the start-up process to deliver benefits sooner. EIS provides everything you need out-of-the-box to configure products, processes, and customer experiences to your unique operational and market requirements.

Innovate faster

Low code configuration and pre-built connectors and extensions allow non-technical staff to test, build, and launch new products quickly. Speed time to market by easily iterating on products, even across multiple lines of business.

Build your ecosystem

EIS can be easily integrated with other platforms and cloud solutions using an expansive library of APIs. APIs allow you to create an ecosystem of suppliers, insurtechs, applications, and third-party data sources to deliver differentiated value to customers.

► FINANCIAL BENEFITS

No upfront costs

An EIS CloudCore subscription is all-inclusive. Let EIS take over the burden of application and infrastructure management along with the core insurance software subscription. No need to buy servers, subscribe to cloud infrastructure, hire and train infrastructure engineers, and monitor 24x7x365. We do that for you.

Flexible accounting

From CapEx to OpEx. With EIS CloudCore you get one predictable subscription price that replaces the variability in infrastructure, human resources, and IT expenses. Minimize both your tangible and intangible expenses while eliminating technical debt.

Scale as you grow

Get peace of mind knowing you can control and predict the cost of your core systems each year. Our model is designed to deliver true economies of scale; the larger you grow, the lower the incremental expense for core systems.

► TECHNICAL BENEFITS

Application updates

Eliminate “big-bang” software upgrades that can lead to system outages and broken integrations. EIS delivers application updates that maximize your functionality and reduce your cost of ownership while allowing you to focus on what drives your business: innovation and product development.

Control operational risk

Our platform offers 24x7x365 resiliency built on a distributed architecture that natively scales and maintains redundancy through replication. Our security and compliance program continuously protects your investment.

Ensure business continuity

Connect to your core systems from anywhere at any time. Users have browser-based access to the functions they need while backend systems and third parties can securely connect to the services and events they need.

Start your journey to SaaS insurance today

Insurance has changed. Fast-paced insurtechs and startups are offering customers digital experiences and personalized coverage that many carriers can't keep up with. Transform your business with EIS. We are the cloud-native insurance platform built to help you become the insurer customers want you to be.

Curious about how a SaaS approach to insurance core-systems technology can help you rapidly deliver business value? We are dedicated to your success. Reach out for a conversation on how EIS can help you innovate and operate like a tech company: fast, simple, agile.
