### TARGET AUDIENCE

This program is designed for Occupational Therapists, Occupational Therapy Assistants, Physical Therapists, Physical Therapist Assistants, Assistive Technology Professionals, and Medical Suppliers/Providers.

### COURSE OVERVIEW

This 60-minute interactive live course will utilize case discussions to drive clinical decision making for manual wheelchair (MWC) prescription. This class is intended to facilitate clinicians and equipment provider's knowledge of how to successfully recommend appropriate seating and mobility devices for people who self-propel a manual wheelchair. Participants will be provided with real case examples and use clinical reasoning skills to identify a client's limitations, goals, and equipment selection to promote functional outcomes. Attendees will be encouraged to participate in active discussion of their case findings and compare solutions.

This course will help guide your practice from standard equipment prescription to best practice for manual wheelchair recommendations for long-term independent self-propulsion to maximize functional mobility. This course will utilize the ICF model to assist the clinical decision-making process to be successful in the provision of seating and positioning solutions for MWC. This course will highlight how power assist devices have a positive impact on quality of life and participation in MRADLs at home and in the community. Upon completion of this course, the participant will have a better understanding of how matching the person with their technology directly affects functional mobility, participation in life roles, wheelchair skills, as well as overall satisfaction with their equipment.

**LEVEL—** Intermediate | **INSTRUCTIONAL METHOD—** Synchronous Live On-site or Streaming Lecture or /Discussion / Clinical Applications / Demonstration

### CEU OBJECTIVES

By the end of the presentation, participants will be able to:

1. Understand 2 frame configurations that can enhance the rider's upright seated posture and stability.
2. Explain 2 influences that seating components have on functional outcomes related to manual wheelchair mobility.
3. Develop 2 measurable goals for a manual wheelchair mobility intervention.
4. Articulate 1 way that power assist technology support seating and mobility goals

## AOTA CATEGORY - OT Service Delivery

### STATEMENT OF CLINICAL RELEVANCE

Content of the activity directly relates to the scope of practice of occupational and physical therapy as defined by the American Occupational Therapy Association (AOTA) and the American Physical Therapy Association (APTA). ### COMPLETION REQUIREMENTS

In order to obtain CEU/CCU credits, participant must attend the entire course, sign in and out, and complete an on-line course assessment following completion of the course.

### OUTLINE

Minutes	Topic
5	Introduction / Overview/ Review Course Objectives
10	Impact of Manual Wheelchair frame configuration
10	Impact of Seating Components
15	Goal setting for seating and mobility
15	Power Assist and Power Mobility Considerations
5	Summary / Question & Answer

**CONTACT HOURS**– 1 | **CEUS**– 0.1

### FEE

The Permobil Academy does NOT charge a fee for live courses of 2 hours or less. However, when 0.3 or more CEUs (3 contact hours) are provided in a live course, there is a minimum \$25 charge. Please check the individual course publication for the specific fee information.

### CANCELLATION AND COMPLAINT POLICIES

Please visit [www.permobil.com](http://www.permobil.com) for the Permobil Academy cancellation and complaint policies.

### ADA STATEMENT
