TARGET AUDIENCE

This program is designed for Occupational Therapists, Occupational Therapy Assistants, Physical Therapists, Physical Therapist Assistants, Assistive Technology Professionals, and Medical Suppliers/Providers.

COURSE OVERVIEW

This 60-minute interactive live course will utilize clinical case discussions to drive clinical decision making for power wheelchair (PWC) prescription. This class is intended to facilitate clinicians and equipment provider's knowledge of how to successfully recommend appropriate seating and mobility devices for people who drive a power wheelchair. Participants will be provided with real case examples and use clinical reasoning skills to identify a client's limitations, goals, and equipment selection to promote functional outcomes. Attendees will be encouraged to participate in active discussion of their case findings and compare solutions.

This course will help guide your practice from standard equipment prescription to best practice for power wheelchair recommendations for long-term independent wheelchair mobility and utilization of power functions. This course will utilize the ICF model to assist the clinical decision-making process to be successful in the provision of seating and positioning solutions for PWC. This course will highlight how input devices have a positive impact on quality of life and participation in MRADLs at home and in the community. Upon completion of this course, the participant will have a better understanding of how matching the person with their technology directly affects functional mobility, participation in life roles, wheelchair skills, as well as overall satisfaction with their equipment.

LEVEL— Intermediate | **INSTRUCTIONAL METHOD**— Synchronous Live On-site or Streaming Lecture /Discussion / Clinical Applications / Demonstration

CEU OBJECTIVES

By the end of the presentation, participants will be able to:

1. Determine 2 aspects of how a seating system can help reduce secondary complications of chronic sitting.
2. Discover 2 ways that power wheelchair input device influences functional outcomes
3. Develop 2 measurable goals for a power mobility intervention.
4. Create 1 plan of care for a power wheelchair prescription based on an individual's medical diagnosis.

AOTA CATEGORY— OT Service Delivery

STATEMENT OF CLINICAL RELEVANCE

Content of the activity directly relates to the scope of practice of occupational and physical therapy as defined by the American Occupational Therapy Association (AOTA) and the American Physical Therapy Association (APTA). Visit our website www.permobilus.com for more details.

COMPLETION REQUIREMENTS

In order to obtain CEU/CCU credits, participant must attend the entire course, sign in and out, and complete an on-line course assessment following completion of the course.

OUTLINE

| Minutes | Topic |
|---------|---|
| 5 | Introduction / Overview/ Review Course Objectives |
| 10 | Impact of Seating Components |
| 10 | Impact of input devices |
| 15 | Goal setting for seating and mobility |
| 15 | Medical diagnosis and prognosis Considerations |
| 5 | Summary / Question & Answer |

CONTACT HOURS— 1 | CEUS— 0.1

FEE
