TARGET AUDIENCE

This program is designed for Occupational Therapists, Occupational Therapy Assistants, Physical Therapists, Physical Therapist Assistants, Assistive Technology Professionals, and Medical Suppliers/Providers.

COURSE OVERVIEW

In many settings, where time and resources are limited, the potential exists to provide standard manual wheelchairs which are not individually customized. This course is intended to be an overview to transitioning your practice from general use and standard equipment to the ideas of best practice for manual wheelchair recommendations for long-term independent self-propulsion to maximize functional mobility. This course will utilize clinical examples to assist the clinical decision-making process about who needs complex rehab technology (CRT), how outcomes can be improved, and how to navigate the CRT provision landscape. Upon completion of this course, clinicians will have a better understanding of how to initiate referrals and recommend manual wheelchair solutions for CRT to optimize client outcomes.

This one-hour, live course is intended to expand clinicians and equipment suppliers' understanding of current best practice concepts when prescribing manual wheelchair solutions for complex rehabilitation technology (CRT).

LEVEL— Introductory | INSTRUCTIONAL METHOD— Synchronous Live On-site or streaming Lecture / Discussion / Clinical Applications / Demonstration

CEU OBJECTIVES

By the end of the presentation, participants will be able to:

- 1. Describe three indications a person may need an evaluation for manual wheelchair complex rehabilitation technology (CRT).
- 2. Discuss three clinical justifications for selecting a rigid manual wheelchair versus a folding manual wheelchair.
- 3. Explain two adjustments to the configuration of the manual wheelchair as it relates to shoulder injury prevention.
- 4. Justify three reasons related to health, function or participation that a client may benefit from a manual wheelchair with a power assist device.

AOTA CATEGORY - OT Service Delivery

STATEMENT OF CLINICAL RELEVANCE

Content of the activity directly relates to the scope of practice of occupational and physical therapy as defined by the American Occupational Therapy Association (AOTA) and the American Physical Therapy Association (APTA). Visit our website www.permobilus.com for more details.

COMPLETION REQUIREMENTS

In order to obtain CEU/CCU credits, participant must attend the entire course, sign in and out, and complete an on-line course assessment following completion of the course.

OUTLINE

Minutes	Topic	
5	Introduction / Overview/ Review Course Objectives	
5	Indications for manual wheelchair mobility	
5	Rigid versus folding manual wheelchairs considerations	
15	Shoulder anatomy and biomechanics as it relates to manual wheelchair propulsion	
15	Common shoulder injuries and prevention as it relates to manual wheelchair configuration	
10	Training techniques for manual wheelchair propulsion and power assist options	

CONTACT HOURS- 1 | CEUS- 0.1

FEE

The Permobil Academy does NOT charge a fee for live courses of 2 hours or less. However, when 0.3 or more CEUs (3 contact hours) are provided in a live course, there is a minimum \$25 charge. Please check the individual course publication for the specific fee information.

CANCELLATION AND COMPLAINT POLICIES

Please visit www.permobil.com for the Permobil Academy cancellation and complaint policies.
