TARGET AUDIENCE

This program is designed for Occupational Therapists, Occupational Therapy Assistants, Physical Therapists, Physical Therapist Assistants, Assistive Technology Professionals, and Medical Suppliers/Providers.

COURSE OVERVIEW

This one-hour, live course is intended to facilitate clinicians' and equipment suppliers' understanding of how to be successful in the provision of powered wheeled mobility – power wheelchairs (PWC) and power assist complex rehabilitation technology (CRT). In many settings, where time and resources are limited, the potential exists to overlook clients who may need CRT solutions but are provided with basic equipment. When a client with long-term wheeled mobility needs is prescribed a product intended for short-term use, secondary complications can occur. This course is intended to promote best-practice power assist and PWC CRT application for successful clinical outcomes using today's technology.

This course will utilize clinical examples to assist the clinical decision-making process about who needs CRT, how outcomes can be improved, and how to navigate the CRT provision landscape. Upon completion of this course, clinicians will have a better understanding of how to initiate referrals and recommend power assist and PWC CRT to optimize client outcomes.

LEVEL— Introductory | INSTRUCTIONAL METHOD— Synchronous Live On-site Lecture or Webinar / Discussion / Clinical Applications / Demonstration

CEU OBJECTIVES

By the end of the presentation, participants will be able to:

- Utilize the ICF model to identify three indications that a person may need an evaluation for a CRT power wheelchair or power assist device.
- 2. Compare three clinically relevant differences among front, mid, and rear-wheel drive power wheelchairs in functional performance for indoor and outdoor mobility.
- 3. Analyze how five different power seat functions are used in everyday life for health, function, and participation. Discuss two potential training techniques to allow for initiation of power mobility and power seat function utilization
- 4. Discuss two potential training techniques to allow for initiation of powered mobility and power seat function utilization.

AOTA CATEGORY - OT Service Delivery

STATEMENT OF CLINICAL RELEVANCE

Content of the activity directly relates to the scope of practice of occupational and physical therapy as defined by the American Occupational Therapy Association (AOTA) and the American Physical Therapy Association (APTA). Visit our website www.permobilus.com for more details.

COMPLETION REQUIREMENTS

In order to obtain CEU/CCU credits, participant must attend the entire course, sign in and out, and complete an on-line course assessment following completion of the course.

OUTLINE

Minutes	Topic
5	Introduction / Overview/ Review Course Objectives
15	Indications for a power assist device or power wheelchair mobility
10	Power wheelchair base configuration considerations
15	Power seat functions and considerations
10	Training techniques powered mobility and seat function utilization
5	Summary / Question & Answer

CONTACT HOURS- 1 | CEUS- 0.1

FEE

The Permobil Academy does NOT charge a fee for live courses of 2 hours or less. However, when 0.3 or more CEUs (3 contact hours) are provided in a live course, there is a minimum \$25 charge. Please check the individual course publication for the specific fee information.

CANCELLATION AND COMPLAINT POLICIES

Please visit www.permobil.com for the Permobil Academy cancellation and complaint policies.

ADA STATEMENT

Permobil Academy complies with the legal requirements of the Americans with Disabilities Act and the rules and regulations thereof. If any participant in this educational activity is in need of accommodations, please call 618-222-3603.

FINANCIAL DISCLOSURE:
