

# Remove Duplicate Truck – Mobile App

## When to Remove Duplicate Trucks

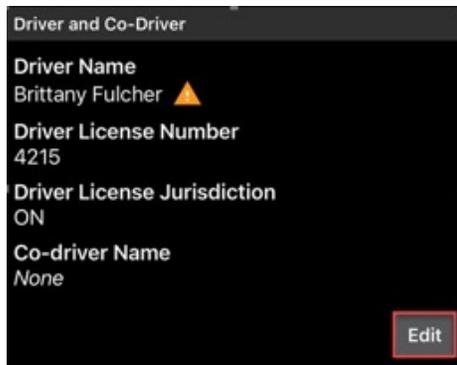

If you notice your total distance for the day is being duplicated, please follow the steps below to verify that a duplicate truck has been added in error to your header and remove it. Removing the duplicate will correct the total distance driven for the day.

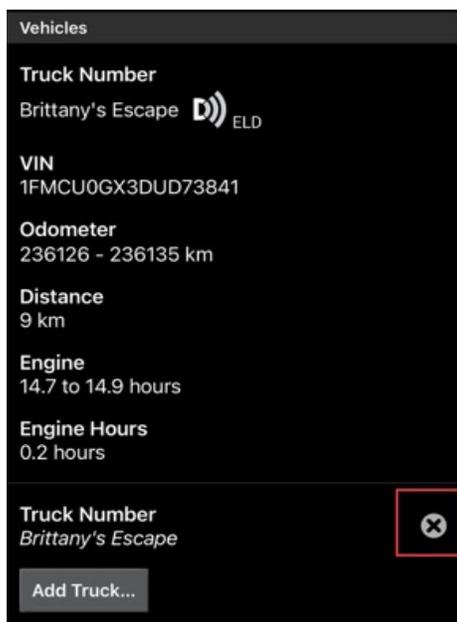

- 1** From the main page of the BigRoad Mobile App, tap **Logs**.
- 2** Tap **View Logs**.
- 3** Select the log for the day you need to edit.
- 4** If you previously signed the log, scroll down until you see your signature and select **Edit daily log**.

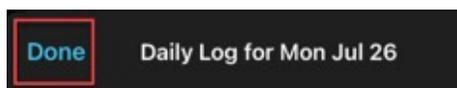

**5** Tap **HEADER** at the top of the log.

**6** Tap the **Edit** button.

**7** Under Vehicles, select the circled 'X' beside the truck that does not have the DashLink ELD symbol.

**8** Tap **Done**. You can now go back and sign the log for the edited day and your total distance driven will be corrected.
