

# LIGHT SUMMERTIME FRAGRANCE SPRAY

ORGANIC  
ALCOHOL  
CO.

## INGREDIENTS

### 8 ounce Distilled Herbal or Flower Water

Or double recipe and use a 16-ounce one

### 2 ounce Organic Alcohol, 190-proof

I used Organic Cane for this recipe

### 25 drops Essential Oils of your choice, be sure to choose a mix of top, middle, and base notes

I used the following mix of essential oils for my scent: 10 drops Neroli, 10 drops Geranium, 5 drops Amyris.

## PREPARATION

**1** Pour your Organic Alcohol into a 12-ounce Dark-colored Glass Spray Bottle

**4** Cap, and give it a good shake

**2** Drop your Essential Oils into your Organic Alcohol and mix well until dissolved

**5** Label your Bottle so you remember what scents were used

**3** Fill Bottle with your Distilled Water

**Always test your essential oils on a small patch of skin to make sure you don't have any reactions. While this fragrance is lighter for misting in summer, it still contains oils and alcohol so make sure to use caution when spraying on certain fabrics or finishes. Enjoy!**
