

CET TRAINING TRACK

Configura's CET training track gives new users a path to follow and guidance on what it will take to become a proficient CET User. The path outlined below is not required or mandatory but if taken in order, while allowing some time in-between courses, our hope is that designers will be much more comfortable with CET by the end. Below we've listed the steps in our recommended track. All courses can be registered for from our CET Academy page [www.configura.com/academy]. Time commitments listed next to each course are represented in the virtual format, but most courses will be available in other formats [Ex. In-Person and Self-Paced].

If you have any questions regarding our training track, please email training@configura.com

GETTING STARTED IN CET WEBINAR

SETTING UP CET

BEGINNER CET

INTERMEDIATE CET

ADVANCED CET

CET CERTIFICATION

1 Hour

CET is introduced to new users so it starts to look familiar and overall capabilities are realized. Core CET content will be covered.

CAN MOVE ON: IMMEDIATELY

2 Hour/ 2 Days

Allow users to customize CET to their preferences before work in the program even begins to allow users to hit the ground running when projects/drawings are started. Core CET content will be covered.

CAN MOVE ON: MINIMUM 1 WEEK

2 Hour / 5 Days

Provides information necessary to complete a simple project from start to finish. The goal is to allow more time and interaction with learners to really grasp basic concepts. Core CET content will be covered during the live portion of training (2hrs) plus information specific to working in a manufacturer's extension will be covered in video tutorial format after live training is complete. Additional daily homework assignments will be required.

CAN MOVE ON: MINIMUM 2 WEEKS

2 Hour/ 5 Days

Will start to introduce topics that help the user to be more efficient in CET along with review of big topics from beginner to get ready for advanced. Core CET content will be covered. Additional daily homework assignments will be required.

CAN MOVE ON: MINIMUM 1 MONTH

3 Hour / 5 Days

By now, the user will be very fluent in the basics of the program and understand it's more advanced capabilities. Topics that were taught in intermediate will be expanded upon, new functionality will be introduced, and real-world scenarios will be worked through using the advanced functionality learned. Core CET content will be covered. Additional daily homework assignments will be required.

CAN MOVE ON: MINIMUM 1 WEEK

2 hours

CET Commercial Interiors Certification certifies that a user can independently create a project within CET from start to finish utilizing basic and advanced tools that are necessary when designing a project in CET. The certification will focus on topics covered in our Beginner to CET course, Intermediate course, and Advanced courses.
