

# Why LeaseQuery?

## Achieve mandatory compliance. Unlock financial insights.

Lease accounting standard changes are one of the most disruptive changes to accounting in over 40 years. Whether you have 5 leases or 5,000, accounting for leases under the new standards involves complex calculations and several new reporting requirements for all public and private companies, and government entities.

LeaseQuery's anchor product was built by accountants to solve this challenge in less than 10 minutes a month while providing insights and possible savings by analyzing your data. The CPA-approved, cloud-based solution facilitates compliance across all industries reporting under ASC 842, GASB 87, and IFRS 16.

## What does LeaseQuery offer?

### Mandatory Compliance

LeaseQuery simplifies accounting for leased assets to better facilitate mandatory compliance with ASC 842 and IFRS 16.

### Financial Insights

Housing all of a business' leases in one solution improves data visibility, streamlines processes, provides significant cost savings insights beyond compliance.

### Operational Efficiency

Automated triggers and audit trails within the solution help save time and allow you to account for your leases with accuracy and simplicity.

- ✓ Faster month-end and year-end close process
- ✓ SOC Report and AUP Engagement issued by a Big 4 public accounting firm
- ✓ Savings and insights from your lease contracts
- ✓ Critical date reminders
- ✓ Accurate AP reports
- ✓ Central repository with easy document retrieval
- ✓ Journal entries available in one click
- ✓ Consolidated disclosure and compliance reports
- ✓ Audit trail and lease change reporting
- ✓ Role-based access
