NATURAL GAS DISTRIBUTION

MADE IN THE USA

PolyPipe is committed to providing quality products and sourcing the raw materials and components in the U.S. for our customers. The Natural Gas Distribution (NDG) pipe is extruded in our U.S. Manufacturing facility in Erwin, Tennessee. The HDPE and MDPE resin is purchased from one of several U.S. suppliers. PolyPipe NGD pipe is 100% U.S. content. Additionally, PolyPipe meets the requirements of the American Recovery and Reinvestment Act (ARRA) as outlined in the Code of Federal Regulations Title 48, Subpart 25.602)a)(2). "All of the... Manufactured goods used as construction materials in the project are produced or manufactured in the United States."
