

Cutover and CloudEndure for IT Disaster Recovery

cutover

Cutover enables organizations to orchestrate work across teams and technologies in dynamic, automated runbooks with real-time visibility and control. When integrated with CloudEndure, Cutover provides best-in-class operational resilience.

50% of large enterprises have no disaster recovery plans in place and 25% of those that do have never tested them. Cutover and CloudEndure Disaster Recovery provide automated, end-to-end disaster recovery for any type of environment - closing the largest gap in disaster recovery:

How Cutover helps with IT Disaster Recovery:

Cutover connects your people, applications, and processes to give you full flexibility, visibility, and control over your disaster recovery process.

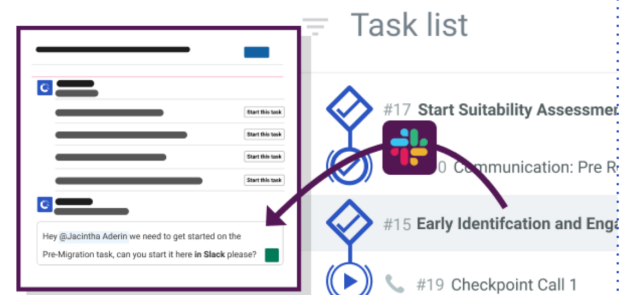

Build

Create **automated runbooks** with dependencies, user assignments and timings.

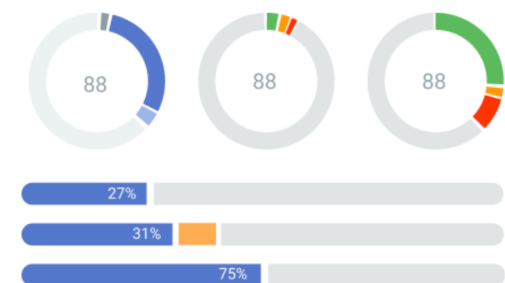

Orchestrate and Automate

Collaborate and stay on track with progress updates and **automated communications**.

Analyze

Gain live **observability** via **dashboards** and systems of record for continuous improvement.

Benefits of using Cutover and CloudEndure

- **Speed:** execute cloud failover in one click, invoke faster, and automate everything
- **Control:** keep your people, processes, tools, and infrastructure in sync, fully recover critical IT environments 24/7, and have full visibility into any issues
- **Ease:** confidently invoke automated end-to-end recovery in one click
- **Flexibility:** replicate from any source, choose from a wide range of OS, application, and database support, and easily fail back to cloud or on-premise databases
- **Reliability:** enjoy robust, predictable, non-disruptive continuous replication, achieve a Recovery Point Objective (RPO) in seconds and a Recovery Time Objective (RTO) in minutes, and protect against ransomware, corruption, and human error
- **Automation:** you don't need an advanced skill set to operate with Cutover and CloudEndure - easily manage disaster recovery tests without causing disruption

About Cutover

Cutover is an enterprise platform built to orchestrate critical activities across teams and technology. Designed to drive operational excellence and navigate complexity, Cutover enables teams to plan, orchestrate, and analyze complex work faster, smarter, and with greater visibility. The platform, developed with decades of experience in managing operational resilience, cloud migration and operations, and application release orchestration, empowers organizations to move quickly with confidence.

Trusted by leading global firms and institutions including Accenture, Barclays, and Deloitte, Cutover is on a mission to enable greater business outcomes by orchestrating teams and automation in a new, observable model of working.
