Cutover for IT Disaster Recovery

Cutover enables organizations to orchestrate work across teams and technologies in dynamic, automated runbooks with real-time visibility and control. By turning complex activities into well-orchestrated, repeatable flows of work, Cutover enables you to run, automate, and repeat crucial resilience activities quickly and efficiently. Our customers use the Cutover platform to host executable recovery plans, manage and execute their test schedules, and provide operational visibility of high-risk change, all while ensuring regulatory compliance.

How Cutover helps with IT Disaster Recovery:

Cutover connects your people, applications, and processes to give you full flexibility, visibility, and control over your disaster recovery process. Plan, test, rehearse and respond to live events in real time.
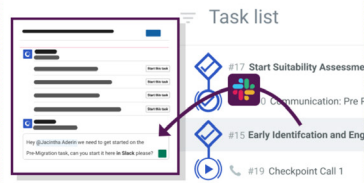

Build

Create **automated runbooks** with dependencies, user assignments and timings.

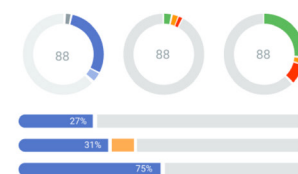

Orchestrate and Automate

Collaborate and stay on track with progress updates and **automated communications.**

Analyze

Gain live **observability via dashboards** and systems of record for continuous improvement.

The benefits of using Cutover:

- Proactively identify change activities that could be a resilience risk
- Easily prepare, find, and manage recovery plans
- Quickly deploy recovery plans when an incident occurs, outlining steps for teams and technology
- Manage incidents with full team collaboration, visibility by leadership, and analytics to enable process reviews and optimization
- Free your team from manual and administrative tasks to focus on higher-value activities

- Manage long-term test planning
- Enhance your investments in service management, DevOps, and collaboration tools through seamless integration
- Enhance visibility for stakeholders through reporting, audit, and analytics capabilities
- Automatically generate an audit trail for the regulator

A recent Forrester study found that Cutover enables our customers to **reduce both event planning time and event execution by 50%, saving $633,600.** Cutover customers are also able to **reduce incidents by 20%** through improved planning and testing, **saving $1.3 million.**

"The ability to automate communications to stakeholders across the business through one system enables us to manage change consistently, reducing customer impact and increasing business confidence in a successful delivery."

Matt Cox, Head of Insight & Innovation, Nationwide Building Society

About Cutover

Cutover helps some of the world's largest, most complex firms to navigate a change-driven economy, both directly and in collaboration with our partner organizations such as AWS, Deloitte, ServiceNow, Accenture, Slack, Twilio, and CS Technology.
