

Tallan Scholarship Program

June 3rd, 2022

Glastonbury, CT

Introduction and Goal

Tallan was inspired to create this scholarship program during our own Project Manager training. We noticed that we had significantly less women than men enrolled in the training and it made us wonder about the statistics surrounding the ratio of men to women in technology. We were astonished by the lack of women in the fields of Science, Technology, Engineering and Math (STEM). It is our hope that through this scholarship program more young women will be inspired to pursue a career in technology.

“In 1970, women made up 38% of all U.S. workers and 8% of STEM workers.
By 2019, the STEM proportion had increased to 27% and women made up 48% of all workers.”
– United States Census Bureau

Process and Guidelines

If you are interested in applying for the scholarship you must:

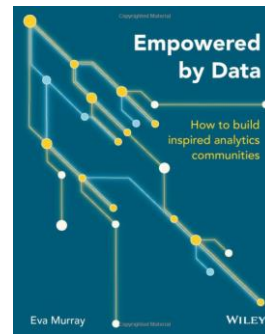

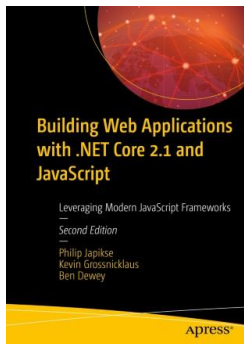

1. Complete the SurveyMonkey application and submit to Samantha.Buccheri@Tallan.com by 5:00 pm on 06/03/2022

About Tallan

Who we are

Founded in 1985, Tallan provides technology and business process consulting services to enterprise and mid-sized companies throughout the United States with a focus on Portals and Collaboration, Business Intelligence, Application Integration, Mobile Platforms, User Experience, Ecommerce, Web Development, and Cloud Services.

Tallan serves organizations nationwide with offices in Hartford, New York, Boston, Atlanta, Orange County, CA, Tampa, and Dallas. Our team includes recognized leaders in the development community with access to new technologies, training, and strategic business insight that position us at the forefront of our industry.

What we do

We listen to every client and understand their specific needs. We complete a comprehensive analysis to determine how we can provide the solution that best meets those needs. And we bring the technical expertise and effective methodologies to architect and implement those solutions from start to finish.

A Tallan solution enhances performance, increases efficiency, eliminates redundancies in data and business processes, and enables better and faster communication of vital information. All with one goal in mind: to help our clients achieve their business goals.
