

GROW BETTER WITH THE RIGHT PRODUCT

Contractor Edition - Essentials

Ideal for Small to Mid-Size Businesses

Did You Know that ProPricer Isn't Just for Large Enterprises?

With ProPricer Contractor Edition- Essentials, small businesses can start using industry-standard pricing software that is not only designed for growth but is also packaged and priced with small and medium sized business in mind.

BENEFITS

- AzureGov cloud services at small business prices
- New, modern UI and standardized environment
- Zero server hardware, IT staff and maintenance costs
- One-to-many relations that allow you to re-use rates and proposals
- DCAA compliant software
- Collaborative activity feeds

UNLIMITED ONLINE SUPPORT

Lean on our ProPricer Technical Support team to get implemented in as little as 30 days.

Secure Your Rates

All rates are stored in a secured database architecture. This single home for cost data allows teams to create a rate table once and use it on as many proposals as needed. If a rate needs to be updated, update it in one place, and rest assured it updated throughout your entire proposal.

Role-Based Environment

Security easy to manage. Assign the users you would like to have access in the system, and then easily set administration status. Once a user no longer needs or should have access, simply disable the user account with just a few mouse clicks.

Standardized Reporting

Make quick and informed decisions to stay competitive with the reporting capabilities. Insights from these reports are designed specifically for government contractors to gain critical metrics throughout your proposal.

Rapid Analysis

Though scaled back, ProPricer Essential 'what-ifs' allow teams to organize estimates, apply rates, and perform 'what-if' analysis in minutes.

Easy to Learn and Use

This online version is ready to use immediately. A guided tour throughout the software is available to help new users get up and running in no time.

Complete Compatibility

With a number of the top U.S. Defense Contractors and Government Agencies using ProPricer, ProPricer Essentials is a great tool to easily submit your cost data to your prime or your government customer. These products integrate seamlessly with each other, all while both parties have complete control of level of cost data detail that is exported.

Discover ProPricer Essentials Today – and see higher margins, increased profits, and more satisfied customers.
