We are experts in intelligent automated document processing, data extraction and document classification. With our state-of-the-art artificial intelligence (AI) technologies, manual data extraction and classification is no longer needed. By enabling up to 90% automation we take automated data extraction and classification one step further and process your documents up to five times faster.

Doculayer Document Intelligence includes:

- ✓ **Digitization** – digitize your documents with our scalable and superior OCR-technology
- ✓ **Classification** – automatically determine document types and tag them with relevant topics
- ✓ **Data extraction** – extract key data from you documents for better decision making and supporting business processes
- ✓ **Data masking** – hide/mask confidential or (privacy) sensitive data on documents to ensure compliance

Key Benefits

Improve operational efficiency and productivity

Increase customer satisfaction

Improve speed and accuracy, reduce manual errors

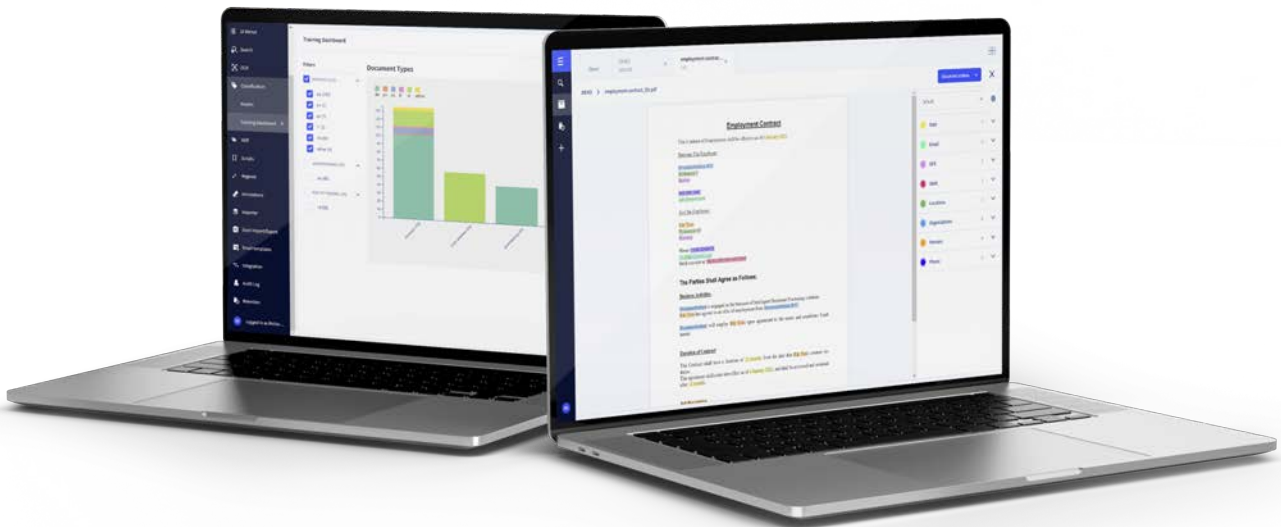

Increase competitive advantage by better service

Ensure compliance and reduce business risk

We are experts in intelligent document processing

About DocuLayer

DocuLayer.ai is an Intelligent Document Processing (IDP) solution for analyzing and automated processing of document flows based on AI-technology. We ensure greater productivity and a better customer experience by automating document flows. DocuLayer.ai integrates seamlessly with business applications and processes in the existing IT landscape and can therefore process unstructured information in existing systems. With this, we respond to the explosive growth of information and the actions required to process data correctly, in accordance with privacy legislation (GDPR).
