DocuLayer Smart OCR applies Artificial Intelligence (AI) to translate your documents into machine usable text with the highest accuracy. It fits perfectly in the existing IT-landscape and ensures hassle and error free business processes.

DocuLayer Smart OCR includes:

- ✓ **Image preprocessing** – improve document quality for optimal processing with rich feature set (deskew, denoise, auto-crop and more)
- ✓ **OCR** – high quality optical character recognition for up to 99% accurate text data
- ✓ **Advanced table capture** – automatically detects and captures table data from your documents
- ✓ **Barcode support** – Captures and reads a wide range of 2D and 3D barcodes
- ✓ **KYC-support** – supports your customer processes with automated extraction and validation of identification documents
- ✓ **Integration** – connects seamlessly to your business processes and data sources via our rich API's and out-of-the-box connectors

Key Benefits

First OCR-solution truly designed to get best results from your RPA and IDP applications

Unique, built-in intelligent quality detection significantly reduces errors

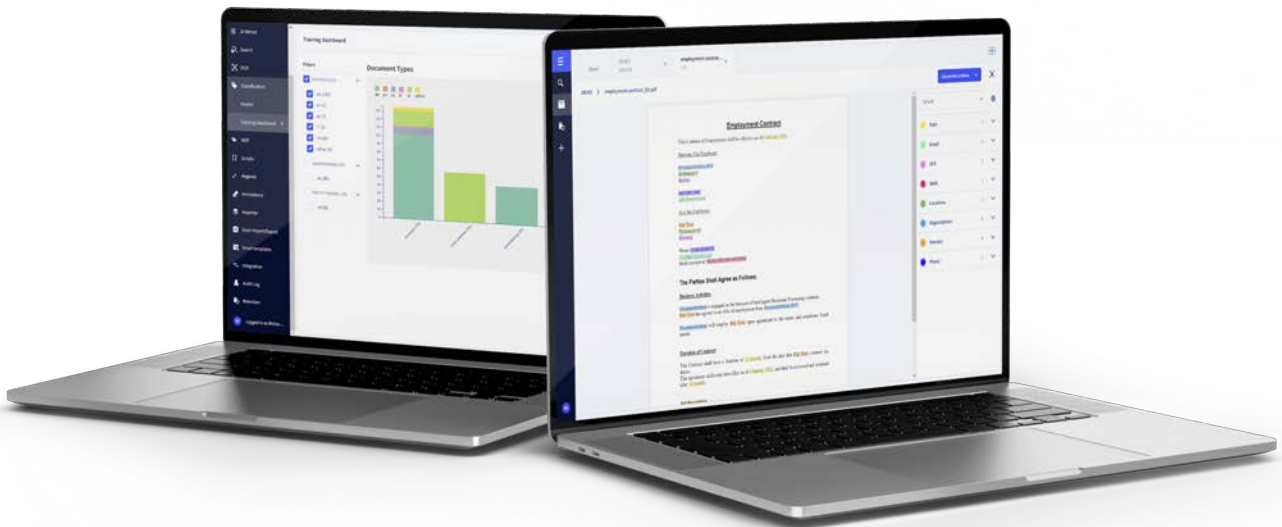

Enterprise grade design ensures high performance and linear scalability

Full unlimited use – all features included, unlimited volumes. No questions asked.

We are experts in intelligent document processing

About DocuLayer

DocuLayer.ai is an Intelligent Document Processing (IDP) solution for analyzing and automated processing of document flows based on AI-technology. We ensure greater productivity and a better customer experience by automating document flows. DocuLayer.ai integrates seamlessly with business applications and processes in the existing IT landscape and can therefore process unstructured information in existing systems. With this, we respond to the explosive growth of information and the actions required to process data correctly, in accordance with privacy legislation (GDPR). For more information, visit www.doculayer.com.
