

flexmls *Tip!*

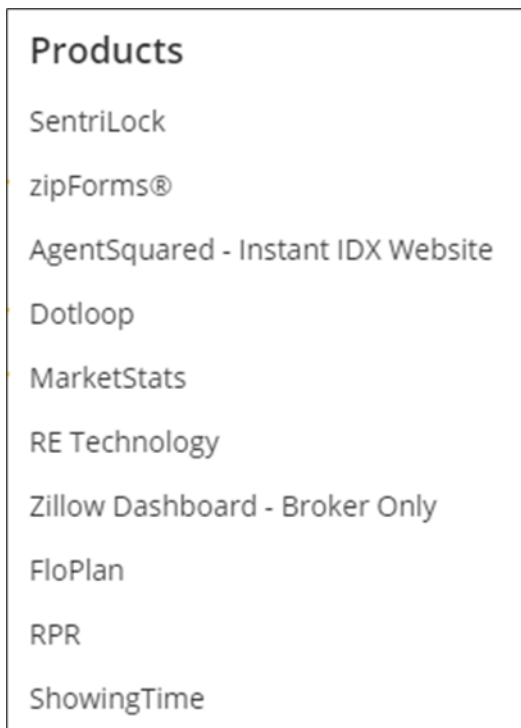

No-Hassle Logins Built Into flexmls

Updated December 2021

Online tools like flexmls have changed the way REALTORS® do business, for the better. However, more online tools often means more usernames and passwords to remember and when you're in a hurry, remembering all of them really slows things down.

What's awesome, is that flexmls has you covered!

Once you've logged into flexmls, you can access SentiLock, zipForm, ShowingTime, and more. Under **Products** in the **Menu**, simply select a vendor to be automatically logged into your account.

It's truly that simple. Now you can access TEN online tools with just ONE login!

HINT! The first time you select a product you may need to log in. Once signed in, your information will be saved and you will access everything with one simple click. Hooray!
