

# Modern Office & Home Furniture

## THE PROBLEM

The customer who is the leading brand in the office furniture space is using Salvagnini laser cutting machines for to manufacture different type of wooden and plastic furniture. This machine runs with high load variation and demand sudden load through system. There is high level harmonics and regenerative power from load side.

## FUJI ELECTRIC SOLUTION

The team of engineers from Fuji Electric visited the site and studied the operations of the machines being used for making the furniture, noting the high load variations, harmonics and regenerative power the team recommended the installation of Falcon 7000 UPS of various capacities to provide uninterrupted power supply to the bending and cutting machines.

## CUSTOMER NAME

Leading Indian Business House well known for Office Furniture

## INDUSTRY

Light Industry / Furniture Manufacturing

## APPLICATION
