

# UPS for IT Industry

## BACKGROUND

Leading IT Industry services and Business Process Outsourcing (BPO) to companies in various vertical and horizontal markets. As the company is providing support to its customers located across the globe it is critical that their systems operate on uninterrupted basis.

## FUJI ELECTRIC SOLUTION

The team of Fuji Electric engineers studied the requirements of IT Industry in detail and proposed Falcon 5000 UPS in parallel configuration alongwith Hornbill Static Transfer Switch to ensure that the operations of workstations at the respective locations continue on an uninterrupted basis as well 24/7 operations of the critical servers used for Networking / Cloud Service / Data Security. Each service is supplied through Hornbill STS to keep one more source as standby which gives more security to these servers.

## CUSTOMER NAME

Leading IT Industry

## INDUSTRY

IT
