

# R&D Lab for Global MNC Major

## BACKGROUND

One of the largest MNC Oral Care FMCG company has its Research & Development lab in Mumbai where different type of its products are tested. Load consists of lab equipments and servers which is very much critical since a single testing process cycle lasts up to a week and no interruption should occur.

## FUJI ELECTRIC SOLUTION

The team of engineers from Fuji Electric studied the requirements of the R&D team and the testing process they carry out. Based on this and finding out that the test process that last upto one week need to be uninterrupted the team proposed the solution of a Falcon 120 KVA UPS in parallel configuration. The UPS was connected to the lab equipment and server to ensure uninterrupted operations of the equipment.
