

SITUATION:

Low voltage during the restaurant's peak operating hours resulted in a malfunction in the air conditioner. The restaurant had to therefore necessarily run the DG set on a continuous basis during peak hours, and face a higher cost of operations.

SECTOR:

Restaurant / Fast Food Eatery,
Oriental Cuisine & YUM
Restaurants

PRODUCT:

Servo Voltage Stabilizer

SOLUTION:

Installation of 75 KVA stabilizer in the restaurant.

RESULT:

With the installation of the stabilizer, the restaurant has stopped using the DG set during peak operating hours except in the case of power break down. The result is a huge saving of approximately Rs. 50,000 in OPEX every month and a pay back in just three months.
