

Eliminating Harmonics in Textiles

THE PROBLEM

The customer a large textile mill in Rajapalayam which is part of a larger business group with a turnover of over 400 crores that is engaged in the fields of Textile, Auto mobile, Non-conventional energy Sources (Wind Mills) and Financial activities over the last several years. The textile mill was identified by the Electricity Board for generating a high level of harmonics and was asked to make rectification.

FUJI ELECTRIC SOLUTION

The team of engineers from Fuji Electric studied the site and the harmonics being generated. Based on this study the team suggested the installation of a 200 Amp IORA 3000 Active Harmonic Filter to reduce the harmonics being generated at the site.
