

# Successful Examinations

## THE PROBLEM

The customer is a franchisee of TCS and is a centre for conducting online examination for govt job opening or entrance for higher studies. They have around 1300 Nos of desktop at their center for the examination takers. As all exams happens online only the systems have to be running during the time of the exam.

## FUJI ELECTRIC SOLUTION

The team of engineers from Fuji Electric studied the requirements of the online examination centre and noted that as all exams happens online only, hence power back up with reliable source is must. Based on this the team recommended the installation of two nos of Falcon 5000 UPS of rating 150 KVA to provide the 1300 workstation power backup for approx. 4Hrs on load during power failure so that exam can be continued without any issue if there is no grid supply.

## CUSTOMER NAME

Operator of Online Examination Centre

## INDUSTRY
