

World Class Shoes

THE PROBLEM

The customer who manufactures shoes for many of the leading brands in Europe uses DESMA machines to manufacture TPR / PVC / TPU Soles. The Company has latest State of Art Machines to manufacture high quality soles with in-house facilities of making moulds, new designs and required sole colors, etc. Power problems lead to variations in the feeding process that leads to rejection of the part and increases the cost and usage of raw material.

FUJI ELECTRIC SOLUTION

The team of engineers from Fuji Electric did a detailed study of the site as well as the operations of the customer and also studied the DESMA machines. Based on this the team recommended the installation of a Falcon 5000 UPS of 120 KVA rating and 80 KVA rating in a standalone configuration to ensure that the machines operate correctly.

CUSTOMER NAME

A Leading World Class Shoes Company

INDUSTRY

Leather Industry

APPLICATION

DESMA Machines

PRODUCT / SOLUTION

UPS

LOCATION

Ranipet Sipcot

RESULT

The customer is satisfied with the UPS solution as it has reduced the rejection of parts due to quality variations as well as reduced wastage of raw material. The machines have been working smoothly enabling the customer to meet the quality requirements of their customers in Europe and North America.
