

Senior Developer

Role Definition

About Us

EV is a young, fast paced, growing FinTech company and the leading UK provider of financial planning and advice technology. Working with over 80% of large financial institutions in the UK, EV's white labelled solutions were used by approximately 200,000 consumers and financial advisers in 2017. We have 70 talented integrated specialists, working across offices in Newbury and London

The benefits of joining our exciting team

As well as offering fantastic opportunities for career progression once established in your role, you will be joining a friendly and relaxed working environment where you will be continuously supported and encouraged to reach your full potential. We have an open culture where you are encouraged to find and fix problems and not to pass them on to some other team. We are a great environment for makers and builders. Sound like you?

We have fantastic benefits, including

- 25 days annual leave, bank holidays, one extra 'company day' for Christmas plus the option to buy a further five days annual leave
- Generous company pension scheme
- Bonus
- Private medical
- Long term disability and Life Insurance
- Study support policy
- Free parking
- A huge range of free hot and cold drinks
- Excellent fully funded company events
- Weekly yogalates classes (on return to office)
- Company football team and Table Tennis team (on return to office)
- Poker nights with pizza! (on return to office)
- The opportunity to support local charities through fundraising events organised throughout the year

Technical Specialist - Developer

Key Responsibilities

EV is recruiting for a Senior Developer/Team Leader with responsibility for the ongoing development, support and maintenance of our market-leading stochastic modelling solutions for the financial services industry.

We are looking for someone who is comfortable wearing two hats. The role will be technically intensive, and you should be prepared to get stuck in and cut code yourself whilst providing guidance as a senior developer in the team.

You will manage a few developers within the team and help the Tech Lead ensure that the team always knows what to do and how to do it.

Required Knowledge and Experience

You need in-depth knowledge and experience of building full stack systems and applications using: React, GraphQL, NodeJS, MongoDB, (MERN stack)

Desirable Experience

Experience of working with TDD, DevOps CI/CD Jenkins Git/bitbucket, is desirable along with experience with Docker and Kubernetes being a bonus.

Financial services experience would be a positive but not essential.

An ability and desire to learn and understand the purpose of the software is essential.

If you want to be part of a business that is looking to shape the future of financial services, contact us today!
