

Horsebox eTrade input guide
July 2021

What do I put for Horsebox vehicle details when the registration number is not pulling through any or only some information?

Due to the nature of the Horsebox product, there often isn't all the information on file about your clients vehicle.

Horsebox manufacturers purchase a chassis and running gear from a manufacturer before the definitive model is known. The manufacturer then builds the horsebox and registers the vehicle with DVLA sometimes using the manufacturer but then their own model type e.g. Peugeot Equi-Trek.

This means that only some or no information will be on file against the registration number. We suggest you pick the make and model that most closely resembles the original donor vehicle.

The Gross Vehicle weight and value are the most important factors so please confirm these with your client.

Updated use of vehicle for Horsebox

We have changed some of our terminology for the 'Use of Vehicle' section:

<u>Business Use</u>	<u>eTrade Use</u>
Leisure Use	Social, Domestic And Pleasure or Commuting
Unpaid Professionals	Personal Business Use
