

## DID YOU KNOW...

### Patient Safety Organizations allow you to...

- securely report adverse events
- legally protect some of your most sensitive quality and safety work
- learn from aggregate industry data on clinical errors and causal factors
- receive professional feedback and analysis on quality and safety processes
- discuss real-time safety events with patient safety experts
- access and contribute to industry trends with aggregate data reported by thousands of providers nationally
- improve culture of safety
- improve organizational sustainability
- reduce preventable harm
- protect conversations and work sessions with your peers (including collaboration with other community providers to improve, for example, care transitions)
- access evidence-based practices to improve patient safety
- access national patient safety sharing and networking opportunities: in-person and virtual
- access education and training on patient safety, leadership, and culture change from leading industry experts

## DID YOU KNOW...

### The Center for Patient Safety is....

- one of the oldest PSOs
- one of the most active PSOs
- one of the most diverse PSOs

With hundreds of thousands of events collected from hundreds of clients across the country, the Center for Patient Safety has spent years evaluating, creating, and fine-tuning its resources based on federal criteria for PSES creation and case-law outcomes. The Center's experts will walk you through the entire process.

discounted rates on other  
CPS services**

## Do you know how a Patient Safety Organization can help you?

About the Center for Patient Safety (CPS): Since 2005, CPS has been committed to improving safety for both patients and providers. We are an independent not-for-profit organization with a mission to reduce preventable harm. We are a federally recognized Patient Safety Organization (PSO) that serves hospitals, long term care, home care, emergency medical services, pharmacies, medical clinics and ambulatory surgery centers across the country.
