TOP 250

PUBLIC CLOUD

MSPsTM

2021 Edition

Welcome & Methodology

Welcome to the Top 250 Public Cloud MSPs 2021 Edition.

The research and rankings leverage ChannelE2E's fourth annual worldwide survey of MSPs (conducted August through October 2021) plus ChannelE2E's editorial coverage and market analysis.

ChannelE2E gathered and analyzed data from the following sources:

- ▶ ChannelE2E readership survey (July–October 2021)
- ▶ Amazon Web Services (AWS), Google Cloud and Microsoft Azure partner program data (October 2021)
- ▶ Gartner Magic Quadrant for Public Cloud IT Transformation Services (2021)
- ▶ MSP websites and associated LinkedIn pages

Public Cloud MSPs were then ranked based on such metrics as:

- ▶ Revenue and profit information from ChannelE2E readership survey
- ▶ Headcount, competencies, certifications and customer engagements from ChannelE2E readership survey and publicly available sources.

Executive Summary

MSPs continue to expand into public cloud markets, and platform providers such as AWS, GCP and Microsoft Azure continue to expand their MSP partner programs.

Still, the public cloud MSP market remains a small subset of the overall managed services sector. The evidence: 300 companies worldwide were recognized as certified MSPs for AWS, Azure and/or GCP as of October 2021, up from 257 in October 2020 according to publicly available information from Amazon, Microsoft and Google.

Nevertheless, the number of certified public cloud MSPs continues to climb higher each month. Among the reasons: Cloud services have become the de-facto standard for managing hybrid workforces during the coronavirus pandemic. Whether the pandemic subsides or re-intensifies, MSPs realize end-customer demand for anywhere, anytime application access is now permanent. Managed cloud services are the least complicated, most efficient way to fulfill such customer demand.

Amid that reality, worldwide spending public cloud services will reach \$809 billion by 2025, up from \$385 billion in 2021, according to IDC. That's a compound annual growth rate of 21%, IDC indicated.

Public cloud MSPs are taking steps to capitalize on that growth. Key trends include:

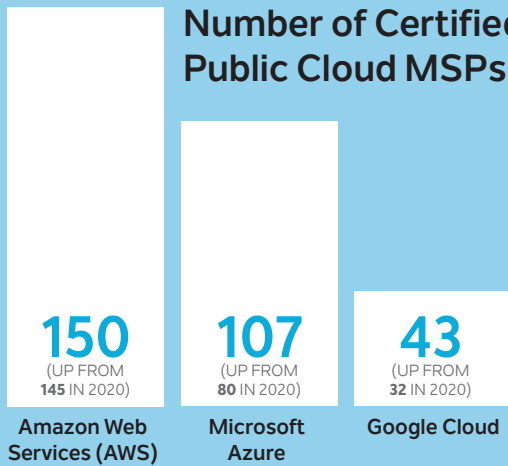

- ▶ **M&A and Private Equity Investments:** Many of the world's Top 250 Public Cloud MSPs remain in acquisition mode. Accenture, Cognizant, Deloitte, Navisite, Thrive, Wipro and many others have made noteworthy acquisitions in the past year. Also, private equity firms continue to acquire and/or back public cloud MSPs. Active buyers and investors since last year's research report include East Los Capital, Eximer Capital, One Equity Partners, Sverica Capital Management and Vitruvian Partners, among others.
- ▶ **Multi-Cloud Management:** Fully 69 percent of ChannelE2E survey participants manage two or more public clouds for end-customers, up from 60 percent in 2020.
- ▶ **Desktop as a Service Shifts:** Amid our survey, the cloud DaaS market began to consolidate around Microsoft's Windows 365 services — which debuted in mid-2021. Instead of building their own desktop virtualization stacks, MSPs are leveraging Windows 365 and/or Azure Virtual Desktop as a simplified DaaS stack.
- ▶ **Cloud Security Services:** Growing demand for cloud security posture management (CSPM) and SaaS application security services continues to extend from the MSSP to MSP ecosystems.

ChannelE2E and our sister site MSSP Alert cover those trends and more on a daily basis.

Market Developments

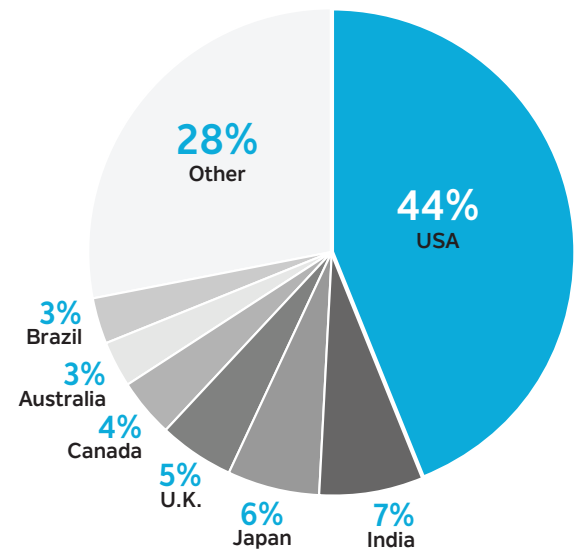

Number of Certified Public Cloud MSPs

ChannelE2E's readership survey extended beyond the certified AWS, Azure and Google partners to include MSPs that conduct business on one or more public clouds.

Source: Amazon, Microsoft and Google partner program websites, October 2021.

Public Cloud MSPs: Location

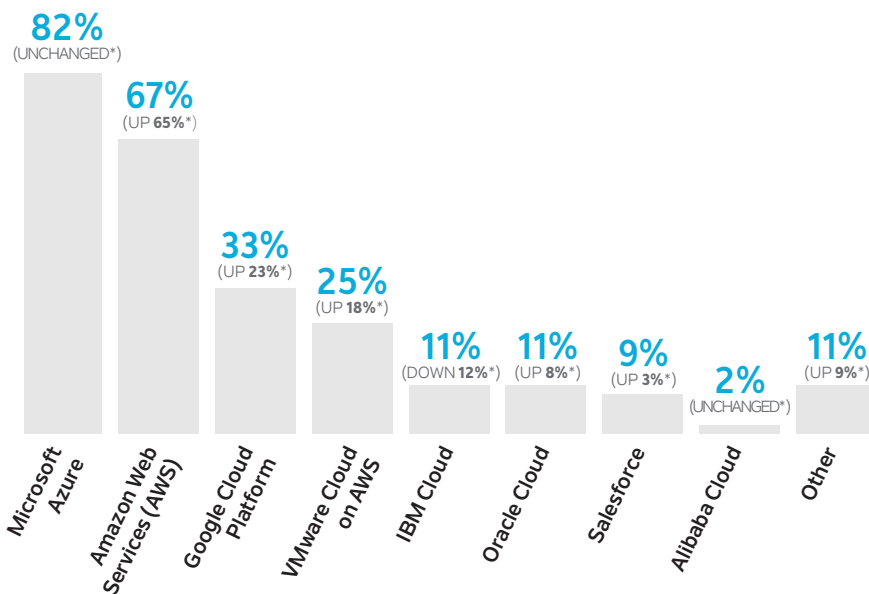

Public Cloud MSPs researched by ChannelE2E are headquartered in 29 different countries, which is unchanged from last year's report.**

* change from 2020

**ChannelE2E Top 250 Public Cloud 250 MSP Survey, 2021 Edition

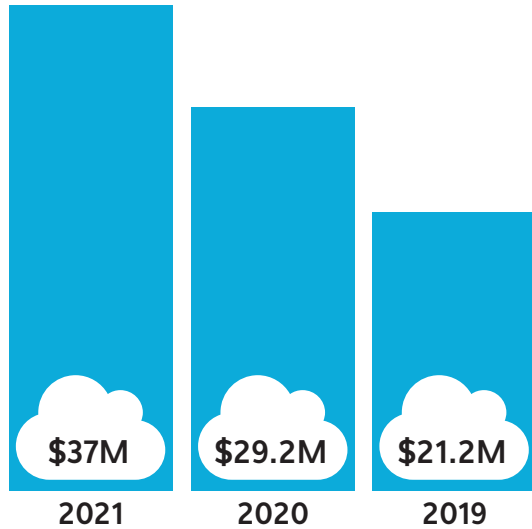

Public Cloud MSPs: Platforms Supported

Microsoft and AWS remain the top areas of focus for public cloud MSPs, though MSPs continue to expand their footprints into the Google, VMware Cloud on AWS, Oracle and Salesforce sectors.**

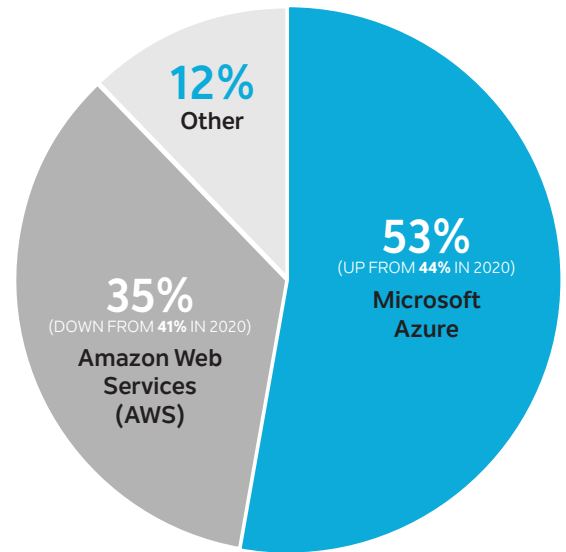

Public Cloud MSPs: Average Revenue

On average, survey participants expect to grow their public cloud revenues 27 percent in 2021 vs. 2020. At the low end of the market, 11 survey participants -- mostly MSPs in the SMB sector -- generate less than \$1 million annual revenue from public cloud services. At the high end of the market, 18 MSPs generate \$100 million or more in annual cloud services revenue, up from 12 MSPs in 2020, according to survey data.*

Which public cloud platform generates the most annual revenue for your MSP?*

How many full-time professionals for each cloud does your MSP employ?

104

(UP FROM 51 IN 2020)

Amazon Web Services (AWS)

62

(UP FROM 28 IN 2020)

Microsoft Azure

25

(UP FROM 7 IN 2020)

VMware Cloud on AWS

19

(UP FROM 18 IN 2020)

Google Cloud

The findings suggest MSPs have vastly accelerated their hiring of AWS, Azure and VMware Cloud on AWS experts. In stark contrast, hiring data for such clouds as IBM and Oracle was not statistically significant.*
