

# 6 SURPRISING BENEFITS

## of Managed IT Services

Are you taking advantage of all that your managed IT services provider offers? The best managed IT services provide:

### REDUCED COSTS

It is estimated that successful deployment of managed services will help in reducing IT costs by 25-45% and will also increase the operational efficiency by 45-60%.

### FASTER INNOVATION

With experience and knowledge comes speed to innovation. IT providers are constantly learning and testing applications & tools that would be useful to their clients.

### EASIER SCALABILITY

Business growth plans? Scaling up for additional staff can be done quickly as additional applications and tools are quick to deploy. Project resources are also available to support your plans.

### PREDICTABLE IT SPENDING

IT services providers participate in your strategic planning, develop a technology roadmap, and create an IT budget for your business. You'll know when tech expenses are anticipated.

### IMPROVED VENDOR MANAGEMENT

Put all your tech vendor management under your trained IT services provider team. Let them coordinate resolutions, negotiate support contracts, and complete app upgrades.

### TIME TO FOCUS ON YOUR CORE BUSINESS

Taking advantage of all that managed services IT providers offer will help you and your staff regain focus on your core business and your customers.
