

PrintReleaf allows you to contribute to reforestation projects around the world based on your print usage. Essentially, the more you print, the more you plant.

PrintReleaf integrates with your company's print software to measure a client's paper footprint in real time.

- 12 international distributors
- 400+ channel partners
- 12,000+ end customers
- 14 billion+ pages released
- 2,500+ standard trees planted per day

PrintReleaf reverse-calculates how many trees were required for the paper footprint.

- 10+ million connectable devices
- Patented technology in the United States & Japan
- Integrated with PrintFleet, FMAudit, Print Audit, MPS Monitor, and EKM Global

Your paper footprint is automatically replanted at global reforestation projects of your choice.

- 8 PrintReleaf Certified™ reforestation projects
- Established PrintReleaf Standard with SGS International
- 2.0 million+ standard trees planted

Global Reforestation Projects

Customers decide where to certifiably reforest their consumption across our network of projects, integrated with WRI's Global Forest Watch platform.

PrintReleaf's third party audit and verification processes are administered by SGS international so customers can be certain that the volume and survivability of trees planted by PrintReleaf's Global Reforestation Partners is accurate.

Testimonials

"Proven IT is committed to providing the strongest sustainability solutions for our clients and the environment. PrintReleaf's automated platform allows us to engage our client's and make a positive difference with significant scale."

Jeremey Fordemwalt

Director of Managed Print
Proven IT

"PrintReleaf has become a major factor in our offerings to managed print services clients. We are impressed with the ease of PrintReleaf implementation and the fact that our clients may select, from seven sites around the world, a precise area to be reforested."

Rick Lingon

VP of Sales
Virginia Business Systems
