In	tegrations	Add-Ons		
Open API	Integrate unique identifiers with other systems that hold your network data.	Mobile	Provides access to five (5) users to view elements from OSPInsight platform on a Mobile device and make simple redline and field note edits.	
GIS Integration	Seamlessly integrate with your preferred GIS. If you don't have a current GIS			
	we can leverage open-source tools as a turn- key solution.	Reporting	Provides view access to all licensed viewers to any pre-configured or customized report, including integrity reports. Provides Editors	
	With Biarri Networks as well as Comsof Fiber		access to custom reporting tools.	
Automated Designs	you can generate FTTx designs and BOMs in minutes. Through OSPInsight you can simply ingest either of their designs into a fully operational OSPInsight database.	Bill of Materials	Provides access to all Editor users the ability to estimate costs for work orders, generate BOM and labor task lists, and manage price lists.	
	Through EXFO's Fiber Guardian, OSPInsight			
Live-Alarm Monitoring	has enabled many customers to monitor their fiber networks 24/7.	Alarm Monitoring	Provides access to all advanced alarm monitoring features for all licensed users.	
	Track true ROI for your fiber network investments by associating key accounts with fiber network developments.		Works with Remote Fiber Test System (sold separately).	
CRM (coming soon)		Visualization Tools	Provides access to all advanced visualization features for all licensed users, including Splice Pro.
