

OSP Insight Integrity 8.0 – Full Install Release Notes 6/9/2020

General

No longer updating the active window while tests are running. That caused performance issues. Test details will be in the related .txt file created after the test completes.

Modified Tests

104: Added an Auto Fix. See test notes in help document for details. Includes new feature to Autofix and Retest individual issues from the Individual Details tab.

108: Added an Auto Fix. See test notes in help document for details.

184: Added an Auto Fix. See test notes in help document for details.

320:

- a. Added an Auto Fix. See test notes in help document for details. Includes new feature to Autofix and Retest individual issues from the Individual Details tab.
- b. Removed tests that were giving the same results as tests 188, 189, and 318

Added Tests

339: Search for idxís that are in more than two link records for non splitters links.

Removed Tests

186: Results were the same as those found in test 320
