

How CircleIn Deters Cheating

CircleIn & Academic Integrity

The primary goal of CircleIn is to facilitate student learning and collaboration, not cheating.

At CircleIn, we work closely with our partner institutions to discourage academic dishonesty in our platform. We can proudly say we have not had any reports of academic misconduct tied to the use of CircleIn as of today.

The following features deter students from cheating:

- Use of institutional credentials to log in
- Report button for students to alert administration about issues
- Administrative ability to remove any concerning post(s)
- Retention of all student-generated content to aid with academic integrity investigations
- Optional faculty and administrator dashboards to view activity in real time

CircleIn incentivizes & positively rewards consistent, proactive study behaviors. We support student learning and success in the following ways:

- Incentivizing effective time management using **Workflow** tasks
- Normalizing peer-to-peer help seeking behaviors
- Increasing study activity with the use of **Flashcards**, study groups & **Notes** features to improve exam performance
- Offering expert mode to embed peer tutors and supplemental instructors in courses to provide in-app course content help & expertise

We highly encourage faculty to discuss academic & community standards with students in class so they understand the best ways to make use of CircleIn specific to your learning outcomes and expectations. Partner with us to make CircleIn a safe and inclusive study space for students.
