

Students build virtual communities together on CircleIn

CircleIn & Student Success

We found that 87% of students report working with classmate(s) helps them learn and study.

Problem:

- 77%** of students report it is difficult to reach out to classmates they do not know and ask to study with them
- 79%** of students report not knowing or having met their classmates
- 70%** of students report not feeling like they belong at their institution

Solution:

CircleIn provides a safe and secure virtual space for students to employ and build proactive, positive academic success habits and study together. Students prefer organization, connection and collaboration in one platform.

- 87%** of students report working with another classmate(s) helps them learn and study
- 76%** of students report helping explain course material to one or more students
