

Deepwatch Expert Engineer Program

**ADVANCE YOUR MANAGED SECURITY
KNOWLEDGE AND PRESALES ACUMEN
WITH TECHNICAL TRAINING ON DEEPWATCH
PRODUCT AND SERVICES**

Knowledge enables success for technical presales teams.

You are the key to helping customers understand the right solution and how to integrate it into their overall security program strategy. With our extensive experience in Managed Detection and Response offerings and security operations we've designed the Deepwatch Expert Engineer Program to expand your knowledge of building and supporting the modern SOC.

Throughout this program you will learn about the services Deepwatch offers, the technologies and methodologies we use, insight into our differentiators, and how we help solve your customers' challenges. Upon successful completion of the program, **you will be awarded the Deepwatch Expert Engineer Program - Certified Engineer (DEEP-ce) certification.** This certification recognizes your expertise on building and evolving a modern SOC - including deploying effective detection and response for advanced threats, and solving business challenges with solutions to mature security operations.

With DEEP-ce certification you will have:

Modern SOC Expertise on how to manage and implement security analytics, how to detect advanced threats, and how to customize a SecOps solution that equips security leaders to mature their security operations

Detailed understanding of Deepwatch's differentiators and benefits

Confidence in Deepwatch's execution paths, from initial sales conversation to daily operation

Understanding and articulation of the business outcomes gained through Deepwatch's services

Tools you need to be successful in selling Deepwatch

Deepwatch Expert Engineer Program

ADVANCE YOUR MANAGED SECURITY
KNOWLEDGE AND PRESALES ACUMEN
