Min/Max - 0/475; 2 decimal places allowed
- 

## **Step 2 Preliminary SI Level by Total Score on Domains I-V**

1. *Preliminary SI Level by Total Score on Domains I-V. Total Score:*  
(Please select one.)
    - (6-8) - SI Level 0
    - (9-12) - SI Level 1
    - (13-17) - SI Level 2
    - (18-22) - SI Level 3
    - (23-26) - SI Level 4
    - (27-30) - SI Level 5
- 

## **Step 3 Application of Independent Criteria**

1. *Action if ECSII Domain Score is 5*

(Please select between 0 and 5 items.)

- I. Degree of Safety -- Moves to Level 5
  - II. Child – Caregiver Relationships -- Moves up 1 Level (only 1 level raised if Domains II and IV are both rated 5)
  - IV. Functional/ Devel. Status -- Moves up 1 Level (only 1 level raised if Domains II and IV are both rated 5)
- 

## Step 4

1. *ECSII SERVICE INTENSITY LEVEL*

---

## Step 5 SERVICES\*\* PROFILE SCORES

**Instructions:** (\*\* Consider one SI level increase if sum of three Services Profile scores = 12 or above)

1. *(A) Child Involvement*

2. *(A) Caregiver Involvement*

3. *(A) Involvement Score*

4. *(B) Fit*

5. *(C) Effectiveness*

6. *Explanation if final disposition differs from the ECSII-derived SI Level*

---

## **STEP 5**

**Instructions:** Services Profile (SP) scores (Domain VI) do not usually change the ECSII SI Score, but are important considerations for individualized service planning. The SI Level may move up 1 level if the sum of SP scores = 12 or above; SP scores may also explain an assignment of SI Level different from the ECSII derived level.
