

Building Evaluation + Buying Process

Legacy Building Solutions is all about helping you, the customer, realize the building you need and want. Our experienced team of professionals will walk you through every step of the building evaluation and buying process.

START

STEP
01

TALK WITH AN EXPERT

From your first contact with Legacy, you are assigned a dedicated building expert who specializes in your industry building application and will work with you to understand your specific needs.

DISCUSS BUILDING DESIGN OPTIONS

A lot of conversation goes into designing a building so our consultants will want to discuss the following list of items:

- Building design specifications
- How the building will be used and what will be stored inside
- Recommend building design efficiencies
- Discuss budget and timeline

STEP
02

RECEIVE A ROUGH ORDER OF MAGNITUDE

With a full understanding of what you are needing for your next building, we provide you with a "rough order of magnitude" ROM to help you make a decision. The ROM includes:

- Preliminary construction timeline
- A preliminary design plan
- List of material specifications
- The cost of the building

STEP
03

SIGN CONTRACT

RECEIVE BUILDING DRAWINGS

Upon final contracting, Legacy's drafting and engineering team brings the initial design and engineering together providing you with a set of building drawings for permitting and manufacturing of your building.

Our engineering team is licensed in multiple states and provinces and can provide stamped drawings in any location in the US and abroad.

STEP
04

ATTEND A PLANNING MEETING

A pre-construction planning meeting will be held between all involved parties making sure the project details and timelines are accurately set for the next phase of the project.

Ensure that your foundation is designed and provide a timeline for its installation.

STEP
05

MANUFACTURING BEGINS

Manufacturing of the building components such as I-beams, fabric, and corrosion protection applications begin. Frames and components are manufactured with our ISO 9001 certified processes. Fabric manufacturing and corrosion protection applications also follow ISO 9001 certified processes, ensuring quality and longevity for your building.

STEP
06

ENSURE FOUNDATION INSTALLATION IS COMPLETE PRIOR TO THE DELIVERY OF BUILDING MATERIALS

INSTALLATION BEGINS

Once manufacturing is complete, and components have passed our rigorous inspection – it is on to installation. Legacy – it offers full installation service with our in-house, highly trained crews.

Legacy is incredibly safe, fast, accurate and was designed to minimize costly surprises and last-minute changes.

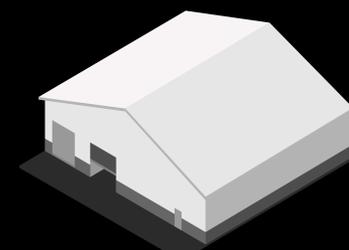

STEP
07

WALK THROUGH YOUR BUILDING

Upon building completion, our install team will do a walk through of the building to ensure your satisfaction with building, building installation and to answer any remaining questions.

STEP
08

FINISH
