Galvanized Chain Link

Galvanized Chain-Link... made to be versatile

PermaFused, the next generation in color chain link fence systems, offers unparalleled performance over ordinary systems, featuring a fused and adhered coating that offers superior protection. Its outstanding resistance to ultra violet light and corrosive environments prevents premature fading and decay. It is an ideal choice for commercial applications that need the security of a chain link fence system and an appearance that blends in beautifully with the environment.

Galvanized Fencing System

All steel components are hot-dip zinc coated and guaranteed for 12 years.

12 Year Warranty

Meets and Exceeds all ASTM Standards

Galvanized After Weaving (GAW)

This process forms or weaves chain-link into a fabric first, and then soaks it in a large galvanized bath which adheres the zinc coating. This ensures that all the wire is coated, even the cut ends created during the weaving process.

Galvanized Before Weaving (GBW)

In this process, the wire is pre-galvanized before it is formed into a fabric. The weaving process creates an exposed cut end that will lack coating and be more apt to some minor rust in wet and severe weather conditions.
