SIMPLIFY PLAYER EVALUATION WITH TEAMGENIUS

A SINGLE SOLUTION FOR TRYOUTS AND CAMPS

TeamGenius is the leading athlete evaluation software provider for youth sports organizations, with an easy-to-use platform for managing tryouts, camps, and player feedback and development programs. We've teamed up with TeamGenius so that you can get instant access to the registration and player data you need to start running athlete evaluation.

HOW THE INTEGRATION WORKS

You can assign LeagueApps programs to new or existing assessments and player pools in your TeamGenius account. When a player registers for that program in LeagueApps, their data is automatically sent to the assigned assessment and player pool in TeamGenius where your coaches can then begin to evaluate them—no double data-entry required!

♥ **WHY CLUBS LOVE TEAMGENIUS**

SUPPORT YOUR COACHES
TeamGenius cuts down on the time coaches spend preparing for evaluation periods and provides an easy-to-use interface for writing real-time feedback.

KEEP PARENTS IN-THE-KNOW
Parents receive a branded feedback report in the app after a tryout or evaluation takes place—making communicating with your customers easier than ever.

INVEST IN PLAYER DEVELOPMENT
Collect and track evaluation data in TeamGenius so you can support your athletes' development, make better decisions at tryouts, and get coaches up to speed quickly.
