

Enkase™ for Health & Beauty

Plastic packaging helps protect your products. Choosing fully recyclable plastics can make a real difference to the world.

HDPE, LDPE and PP are broadly used plastics in the Health & Beauty market, but are not effective barriers against many ingredients – allowing them to escape unopened packages.

- Be fully recyclable** (Icon: Recycled heart)
- Increase shelf life** (Icon: Hourglass)
- Reduce ingredient loss** (Icon: Bottle outline)
- Maintain quality** (Icon: Checkmark in seal)
- Ensure compliance** (Icon: Clipboard with checkmarks)
- Safeguard health and environment** (Icon: Earth globe)
- Facilitates use of mono-materials** (Icon: Bottle outline)
- Enables PCR** (Icon: Recycled symbol)

- ✓ Only fully recyclable barrier packaging
- ✓ Improve your customers' experience
- ✓ Increase your products' sustainability

Whether your product formulation is water-based or organic, Enkase protects its integrity by reducing ingredient loss, increasing shelf life, maintaining quality and protecting your brand.

Enkase can be applied to any packaging, regardless of size or shape and enables packaging to be lighter, reducing costs and waste. Enkase is a trusted, globally recognized, 100% recyclable technology already used for PCR streams.
