

Email, Collaboration, Instant Messaging, and More - Trusted by Businesses Worldwide

The MDAemon Email Server is trusted by businesses in over 140 countries around the world, providing reliable and secure email without expensive administration or high per-user costs. The Windows-based software requires almost no maintenance and offers email, webmail, collaboration, mobile device management, and more.

Key Features and Benefits

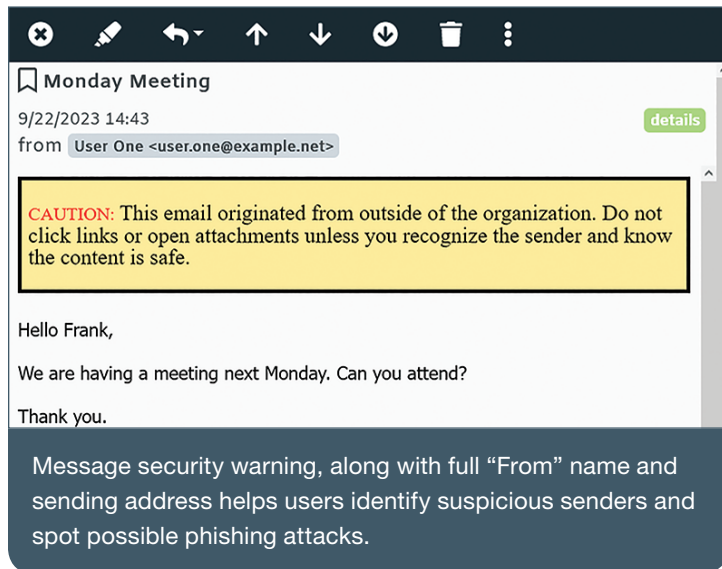

- Virtual, hosted, or on-premise deployment flexibility
- Intuitive mobile device management console to easily manage mobile devices. View, set and change mobile device policies (lock, remote wipe, etc.)
- Monitoring and alerts to notify the administrator of suspected breaches
- Strong email security and deliverability using DMARC, DKIM, SPF, spam filtering, spam learning, SSL/TLS, backscatter protection, spambot detection, and much more
- Security policy tools such as application passwords, password complexity settings and two-factor authentication
- Flexible outbound email management using custom delivery schedules and mail queues
- Centralized management of email client signatures
- Integrated web-based email (MDaemon Webmail) delivers full collaboration, message recall, attachment reminders, and more
- Public folder ticketing system using any email client
- Integrated instant messaging with support for popular IM clients
- Microsoft Outlook compatibility
- High availability multi-server clustering support for protection against service interruptions

MDaemon Webmail - Web-Based Email, Collaboration & More

MDaemon Webmail provides seamless communication, file sharing, and collaboration - with integrated contacts, tasks, shared documents, voice memos, notes, and instant messaging.

Identify Suspicious Emails

Monday Meeting

9/22/2023 14:43

from User One <user.one@example.net>

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

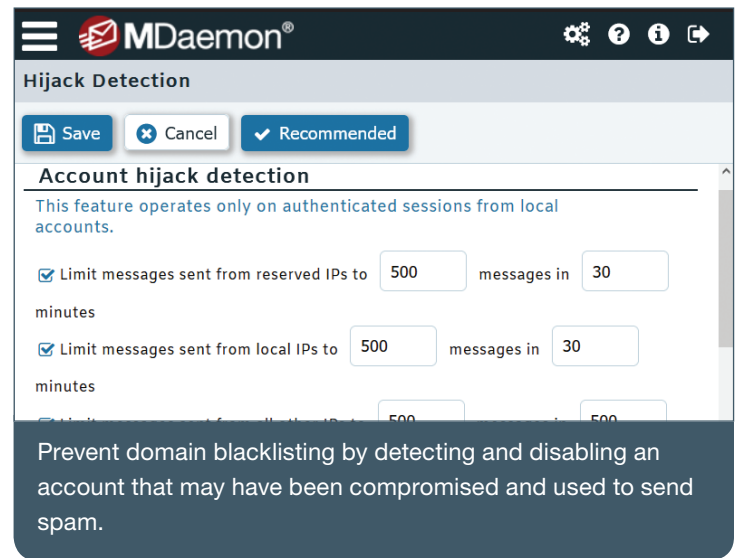

Hello Frank,

We are having a meeting next Monday. Can you attend?

Thank you.

Message security warning, along with full "From" name and sending address helps users identify suspicious senders and spot possible phishing attacks.

Email Account Hijack Detection

Hijack Detection

Save Cancel Recommended

Account hijack detection

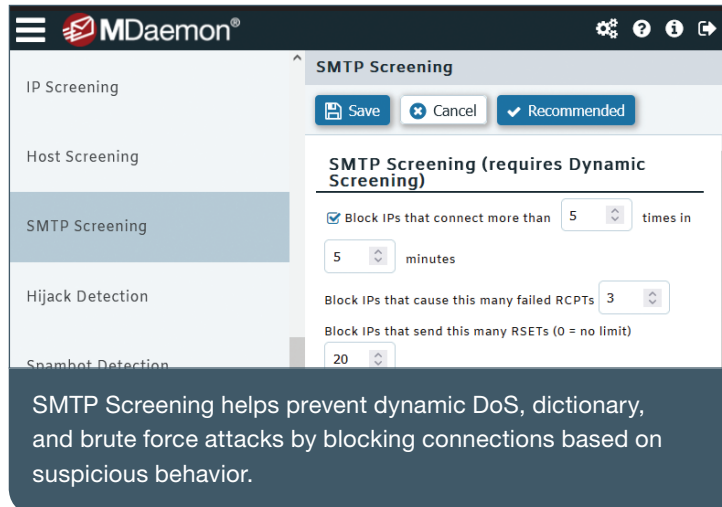

This feature operates only on authenticated sessions from local accounts.

Limit messages sent from reserved IPs to 500 messages in 30 minutes

Limit messages sent from local IPs to 500 messages in 30 minutes

Prevent domain blacklisting by detecting and disabling an account that may have been compromised and used to send spam.

Block Suspicious Connection Activities

SMTP Screening

Save Cancel Recommended

SMTP Screening (requires Dynamic Screening)

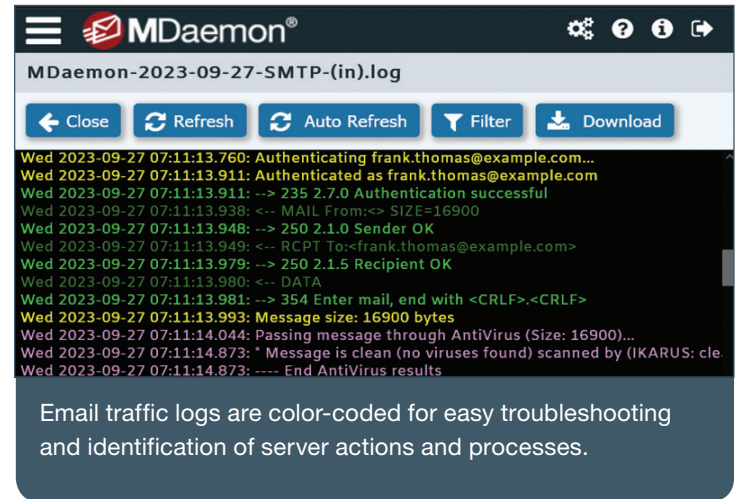

Block IPs that connect more than 5 times in 5 minutes

Block IPs that cause this many failed RCPTs 3

Block IPs that send this many RSETs (0 = no limit) 20

SMTP Screening helps prevent dynamic DoS, dictionary, and brute force attacks by blocking connections based on suspicious behavior.
