

Healthcare Software Solution Development

Healthcare providers are experiencing unprecedented challenges. According to Gartner, 63% of providers have faced severe disruptions due to organizational changes, cost pressures, regulation and compliance, lack of funding, and shifting consumer demands. *Can you relate?*

These challenges—among many others—require you and your healthcare organization to embrace a digital-first strategy that prioritizes engagement, interaction, and innovative products and services.

HatchWorks can help get you there.

By building new and enhanced software products that deliver unique, valuable experiences, we are enabling organizations that provide critical healthcare services to work smarter and more efficiently.

Whether you want to deliver a healthcare service or product in a unique way, support complex workflows or care approaches, or leverage data for valuable insights and outcomes, HatchWorks has the expertise you need.

We work with:

- Organizations with intellectual property or science-based approaches
- Private healthcare organizations
- Device users and manufacturers

Types of healthcare solutions

Organizations including Spring Hills, Integrated Care Solutions and more have trusted HatchWorks to create custom healthcare management, claims, and analytics solutions.

Healthcare management software:

- Optimize and automate processes and improve overall service quality
- Integrate data needed to make optimal health decisions
- Enhance patient care

Healthcare claims processing software:

- Ingest, analyze and process claims data
- Validate accuracy of claims data
- Calculate comparative benchmarks and billing code improvements

Healthcare analytics software:

- Collect and provide data insights regarding patient care, management, billing procedures, scheduling, and more
- Measure and document value-based care outcomes for reporting, billing, and measurement of at-risk contract performance
- Identify at-risk patients and prioritize patient cohorts for care

We specialize in:

- HIPAA and accessibility compliance
- Standard data library integration
- Patient medical record management
- Population health and cohort identification and management
- Critical functionality to support flexible clinical care management approaches
- Patient transition through care settings tracking
- Program and administrative controls to manage contractual relationships
 - Payment models
 - At-risk contracts
- Data / system integration and processing
 - Claims data processing
 - IOT device data
 - ADT (admissions, discharges and transfer)
- Analytics / BI
 - Productivity and workload analytics
 - Financial benchmarking
 - Measurement of value-based care outcomes

How we ensure your success

Building on our experience with healthcare organizations, HatchWorks has the ability to understand your technical requirements and organizational needs.

Our full lifecycle software development service includes:

Strategy

Define the “why” and “who” of your product idea, and prioritize the problems your solution will solve.

Design

Envision and rapidly prototype the “what” and “how” of your solution, and map how to deliver incremental value to your customers.

Development

Leverage our proven framework for developing your product in an Agile, iterative fashion using the Build-Measure-Learn feedback loop.

Application Management

Benefit from cloud automation and efficiency, reduce Total Cost of Ownership (TCO), and maintain your application for a flat monthly fee.

Why HatchWorks?

Multi-year industry experience

Each team member has 10+ years of expertise in building healthcare software and hardware solutions.

Cross-functional team with broad expertise

Our Product, Design, and Engineering teams solve problems holistically. Combined, our extensive skill sets in software development and cloud native applications enable us to not only define a successful solution, but build that solution with the right technology in a scalable and secure way.

Security and regulatory compliance

We guarantee alignment with all regulations, protocols, and best practices related to accessibility, security and data—including but not limited to HIPAA and WCAG AA.

“Our journey together with HatchWorks has been wonderful. If something is wrong, we fix it and work on it together. The team has been wonderful; I have no doubt in my mind that this product will be a slam dunk.”

—Gloria Berwick, VP of Operations, Spring Hills

Does your health-based organization have a vision to expand or evolve your service offerings? Do you need the expertise of an award-winning, full lifecycle software development team to achieve that goal?

Contact HatchWorks today to learn how we can ignite your vision, accelerate your time-to-market and time-to-value, and enable you to succeed now, and in the future.
