

YOUR SUPER-CHARGED AIR PURIFIER.

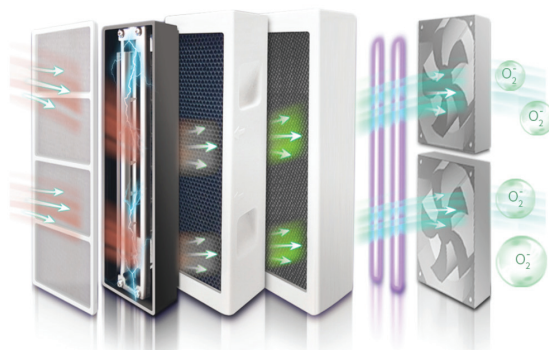

The Atmosphere uses our HydroClear Technology, harnessing the power of UV light, catalytic filters and electrostatic fields to generate hydroxyls and inactivate pathogens continuously in occupied spaces. ClearZone's HydroClear Technology is an air-based solution that reduces pathogens on hard and soft surfaces and in the air. UV-C is a germicide, which means it can kill up to 99.99% of bacteria and viruses. The Atmosphere is environmentally sustainable leaving behind no residue and requiring no chemical refills. It has proven to kill everything from allergens to bacteria and viruses.

We work with top laboratories to privately test our products and proprietary process to meet federal and international standards. We focus on science and safety, so you can focus on your business.

THE ATMOSPHERE.

- Ideal for spaces up to 400, 1000, 1500 sq ft
- All-natural disinfecting
- Light-weight
- HydroClear Technology

The Atmosphere series of products are ideal for use in occupied spaces such as restaurants, lobbies, halls, offices, medical facilities and more. It is lightweight and quiet allowing it to fit into many different rooms. Using the Atmosphere is as simple as turning the machine on, eliminating human error and decreasing labour costs.
