

Food Allergy Safety

ALLERGEN SAFE

DESIGNATED GLUTEN SAFE™

MERCER CULINARY®

ALLERGEN **SAFE**

According to the Centers for Disease Control table of Summary Health Statistics published in 2017, approximately 6.5% of children under the age of 18, suffer from food allergies². Eight foods account for 90% of all food-allergic reactions: milk, eggs, peanuts, tree nuts, wheat, soy, fish, and shellfish³.

Our Allergen Safe product line uses the industry standard purple to quickly and easily identify use with non-allergen causing foods. This provides a system that is easy to follow and manage, plus provides your customers with a greater degree of safety.

Whether you are slicing, chopping, mixing, spreading, baking or turning, Mercer has a product that performs at a high level, is easy to clean and built to last.

The gluten free movement continues to be a strong trend. As of January 2017 approximately 3.1 million Americans were following a gluten free diet⁴. In its 2018 culinary forecast, the National Restaurant Association (NRA) reported that 44% of chefs surveyed deem gluten free a hot trend⁵. And in an August 2018 article on Food Technology website (ift.org), it is noted that the term "gluten-free" is mentioned on 26% of U.S. restaurant menus, up 182% over the past four years and 10% in the past year⁶.

How will you respond to this health trend to keep your customers safe? Mercer's line of Gluten-Safe tools makes it easy to distinguish between tools designated for Gluten-Free foods. Take the guesswork out of potential cross-contamination to protect your customers and bottom line.

ALLERGEN™ SAFE

Food Allergies are a growing public health concern. As many as 15 million Americans have food allergies¹. The number of people looking to reduce or eliminate gluten from their diet is increasing rapidly. This growing health concern is in response to dealing with Celiac Disease along with the perception that a gluten-free diet leads to a healthier lifestyle. When addressing these dietary issues, it is essential customers feel foods are being handled safely and with a process that minimizes risk.

Mercer Culinary® has seen these growing trends in the foodservice industry and the problems they present to operations. This led us to design and develop a line of products which offer an easy way to identify and implement systems to safely prep, cook, and serve food. These products are intended to hold up to the toughest commercial environments and their prominent purple color makes them easy for staff to keep their dedicated use.

Spreaders – 3 1/2" Plain and

Wavy Edge, Bench Scraper

Hell's Tools® – Mixing Spoon,

Slotted Spatula, Utility Tongs

Silicone Bake Mats –

Full and Half-Size

APPLICATIONS

Pizza and Flatbread

Cutters feature ultra-sharp, high-carbon steel blades with ground edges. Santoprene® handles are ergonomic and slip-resistant. Pie servers have tempered steel blades and are ideal for serving individual portions.

Bread

The wavy edge bread knives feature commercial quality Japanese steel and a raised Santoprene® textured handle for vastly improved grip and greater comfort. Plain or wavy edge spreaders are great for jams, jellies or condiments.

Baking

Silicone bake and work mats are available for full and half size sheet pans. Outer edges have a purple border. Mats are naturally non-stick, providing excellent release, and reducing the need for fats or oils. Measurement marks in inches and centimeters for quick reference.

Slotted nylon spatulas have high temperature resistance (430°F/220°C), great flexibility, and a beveled front edge that makes picking up cookies and other baked goods easy. High temperature resistant tongs are excellent for picking up scones and other larger baked goods.

Pasta

Turners cut through lasagna and other baked pasta dishes and serve perfectly sized pieces. A variety of sizes are available. Use the high temperature resistant spoon to stir or add sauce. Tongs are ideal for picking up pasta to transfer to plates.

Prep

Chopping, slicing and dicing can all be achieved efficiently with the complete line of Millennia® knives featuring ergonomic and slip resistant raised Santoprene® textured handles. Blades are constructed from high-quality Japanese steel and ground to a sharp edge. The high temperature spoon and tongs offer tremendous flexibility to stir, mix, or toss ingredients.
