

Deliver world-class learning content to engage your customers

virtu platform

Virti uses VR, AR, artificial intelligence and game design to help employees learn faster and remember training for longer.

Interactive Video

Our cloud-based video platform enables you to store and manage interactive 2D and VR training videos for your organisation.

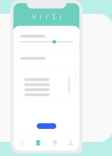

AI Powered Virtual Humans

Drive behaviour change in your organisation with AI-powered virtual humans to train soft-skills.

Feedback

Our feedback suite allows for real-time employee and customer feedback to be collected & analysed from within the platform.

Engaging Content

Delight customers with Industry leading learning technology

Transform traditional text-based content into immersive learning experiences that can result in a 230% knowledge increase.

Easily build, scale and deploy immersive learning material that is scientifically proven to result in increased knowledge retention and ensure your learners return time and time again.

Power Skills

Enable customers to intuitively practise new skills

Help drive behavioural change in organisations

Our AI-powered virtual humans allow for digital power-skills role play on desktop, mobile and in XR headsets. Give your customers a safe space to practise and learn using virtual reality to build empathy and human skills.

NO-CODE CONTENT CREATION

Use immersive technology and AI to scale face-to-face experiential training **fast**.

1

Create

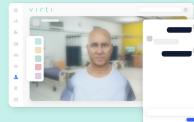

Use our no-code creation suites to create effective learning content for your people.

2

Scale

Distribute your learning content to learners via our Virtu App on demand, accessible at any time, on any device.

3

Analyse

Capture detailed qualitative and quantitative data to track and tailor experiences for the individual.
