## imageRUNNER ADVANCE DX OVERVIEW

***Supporting customers' digital transformation initiatives through advanced scan functionality and cloud-ready capabilities.***

### Simplify

The power to streamline user workflows and ease the implementation and management of technology

- Easy, Intuitive, and Consistent
- Customized Experience
- Integrating Workflows And Access to Cloud
- Centrally Manage a Fleet
- High Quality and Durability for Hassle-Free Uptime
- Easy To Set Up, Easy To Maintain

### Control

The power to take command of costs, manage print usage, and implement a secure solution

- Data and Network Security
- Security Management
- Monitor Usage and Control Costs

### Evolve

The power to expand capabilities and stay ahead of change

- Full Suite of Workflow Solutions
- Continuous Improvements
- Embedded App Development
- A Clean, Bright Future for All

The imageRUNNER ADVANCE DX C5800 Series replaces the existing imageRUNNER ADVANCE C5700 Series, with models within Dataquest Segment 3 color and Segment 4 color. The imageRUNNER ADVANCE DX C5800 Series models were designed as reliable, durable products that can easily integrate with Canon's holistic business solutions. When designing this product, a strong emphasis was placed on ease of use, outstanding image quality, fast color in a compact size, and a focus on authentication.

The target markets for the imageRUNNER ADVANCE DX C5800 Series are small- to mid-size offices that require quality color in a compact size as well as departments within large enterprises, where a fleet of imageRUNNER ADVANCE DX C5800 Series systems combined with other imageRUNNER ADVANCE models provide a strong solution with consistent usability. Enhancements to the Third Generation imageRUNNER ADVANCE platform with the launch of imageRUNNER ADVANCE DX platform also make these models an appropriate fit for environments that require a mobile workflow.

Within the Canon color line-up, the imageRUNNER ADVANCE DX C5800 Series falls between the imageRUNNER ADVANCE DX C3700 Series and the imageRUNNER ADVANCE DX C7700 Series. The imageRUNNER ADVANCE DX C3700 Series consists of two color A3 models supporting lower print volumes at speeds of up to 30/25 ppm. The imageRUNNER ADVANCE DX C7700 Series consists of three color A3 models supporting higher print volumes at faster speeds (up to 80/70 ppm) and offer more robust paper handling and finishing options.

See the following pages for positioning lineup charts and key differentiators that may help guide the selection of the right product for a specific customer.

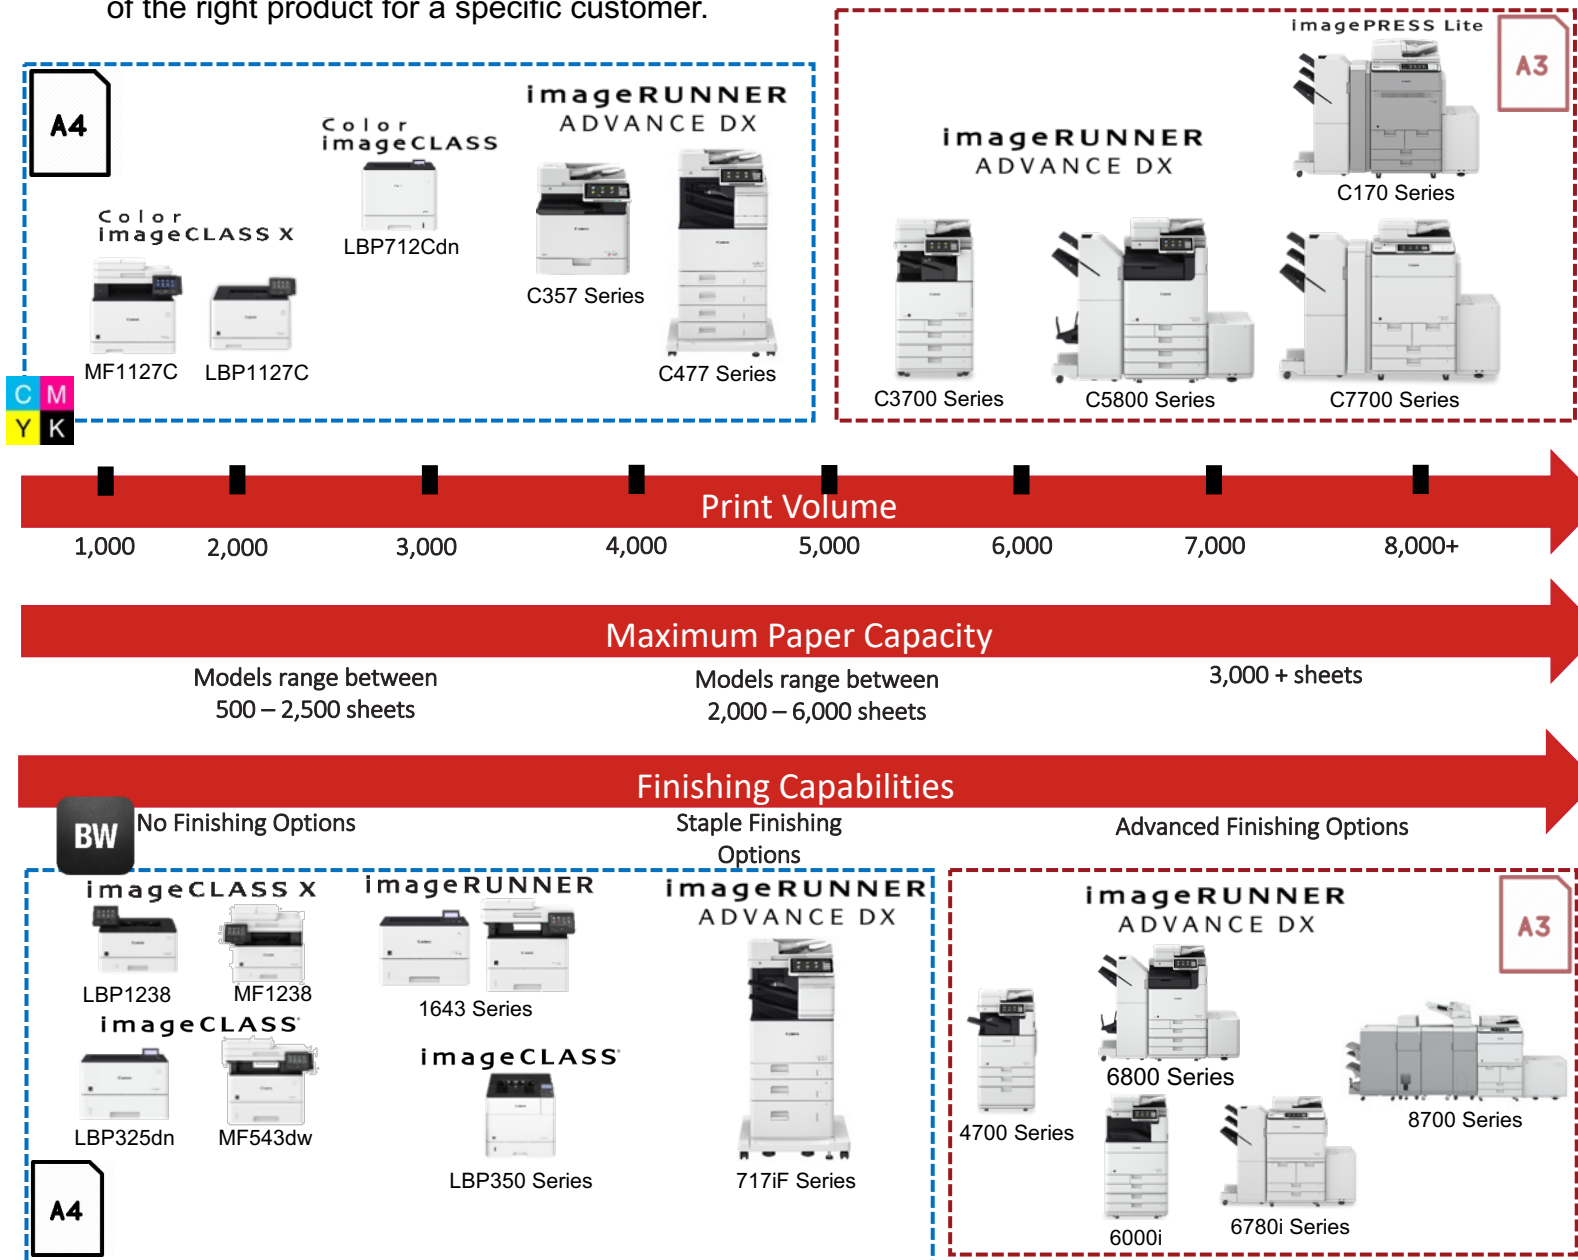

Series	Model	Speed* (BW/Color, LTR)	Dataquest Segment	Optimum Zone	Max. Volume**
iR ADV C5800 DX Series	iR ADV DX 5870i	Up to 70 ppm	Segment 4	14-80K	350K
	iR ADV DX 5860i	Up to 60 ppm	Segment 4	12-60K	300K
	iR ADV DX C5850i	Up to 50 ppm	Segment 3	10-50K	230K
	iR ADV DX C5840i	Up to 40 ppm	Segment 3	5-45K	170K

\* Print speed is based on internal testing. Print speed may vary depending on the number of copies selected, as well as on the settings for size, type, and orientation of paper.

\*\* The maximum monthly volume (print/copy) represents the maximum number of pages the machine can produce within a one month period. It is not recommended to operate the machine at or beyond this volume on a consistent monthly basis.

## PRODUCT POSITIONING

The following pages include lineup overviews and differentiators that may help guide the selection of the right product for a specific customer.

### Device Spotlight

- **Print Volume** – 5-80K
- **Maximum Paper Capacity** – 6,350 Sheets
- **Finishing Options** – Staple/Booklet/Inner Finisher with Hole Puncher
- **Security Features**- McAfee Embedded Control, SIEM Integration, SSD Security
- **Native Device Storage**- Mail Box/Advance Box features

## KEY PRODUCT SALES POINTS

- **imageRUNNER ADVANCE DX Platform**

The imageRUNNER ADVANCE DX C5800 Series has a strong feature set focused on Workflow Efficiency, Device & Fleet Management Efficiency, Security, Cost Management, Sustainability, and Reliability.

For more information about all of the features available with the Third Generation imageRUNNER ADVANCE platform, see the Third Generation imageRUNNER ADVANCE and imageRUNNER ADVANCE DX Platform Handbook.

- **The imageRUNNER ADVANCE DX C5800 Series has a strong standard feature set including the following:**

Advanced  
Personalization  
with My ADVANCE

TPM 2.0

FTPS Support

TLS 1.3 Support

10.1 in Touch  
Screen  
w/ Soft-Keys

Fast Scan Speeds

uniFLOW Online  
Express

McAfee Embedded  
Control

Solid State Drive  
(SSD)

Universal Print  
by Microsoft

Remote Operation  
with Canon PRINT  
Business APP

Fast & Easy  
Replaceable Parts

## KEY PRODUCT SALES POINTS

## Features

### ✓ Flexible Authentication

Users are required to authenticate at the imageRUNNER ADVANCE system using a Proximity Card,\* PIN code, Image login and optional PIN Code, or Department ID.

### ✓ Secure Printing

Users' print jobs can be pulled to whichever networked imageRUNNER ADVANCE system they choose, and print jobs are only released when authenticating at the device.

### ✓ Print From Cloud

Users can now print from connected cloud services on connected Canon imageRUNNER ADVANCE devices. Supported cloud services include Box, Dropbox, Evernote®, Google Drive™, Microsoft OneDrive®/OneDrive® for Business and SharePoint® Online. Folder browsing and finishing options are supported.

### ✓ Secure Document Scanning

With uniFLOW Online users can scan documents directly from any connected Canon imageRUNNER ADVANCE. The lean and intuitive user interface plus single sign-on to the secure "Scan-to-Myself" and "Scan-to-Google Drive"™ workflows help to bring about gains in productivity. With an additional scan subscription, users can scan directly to the following cloud-based destinations: Box, Microsoft OneDrive®, Microsoft OneDrive® for Business, Evernote®, Microsoft SharePoint® Online, Dropbox, and Concur®.

### ✓ Send Print Jobs From Anywhere

Users can submit print jobs from their networked, compatible PCs, smartphones, tablets, or the Mobile Print & Scan App, and print job submissions will follow them from one compatible device to another.

### ✓ Cloud-based Infrastructure

There's no requirement for local uniFLOW servers, and configuration and management of the system takes place in the cloud.

### ✓ Track Print, Scan, Copy, and Fax Costs

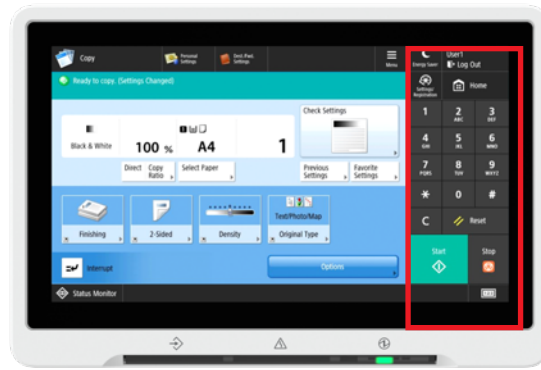

Administrators can use the comprehensive uniFLOW Online Dashboard to view valuable analytical information. Device activity costs can be allocated to users or departments. If needed, administrators can even create different projects or cases under the cost center menu so that users can charge their print, scan, or copy charges accordingly.

\* imageRUNNER ADVANCE systems, Universal Login Manager, Proximity Card Readers, and Cards are sold separately. uniFLOW online is optional for imageRUNNER ADVANCE devices. .

## KEY PRODUCT SALES POINTS

- Display Configuration**

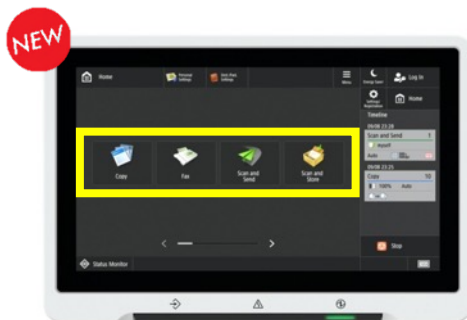

The 10.1" WSVGA fully flat touch display includes a soft-key numeric pad. This compact, full-touch design allows for easy access to internal trays and an optional card reader.

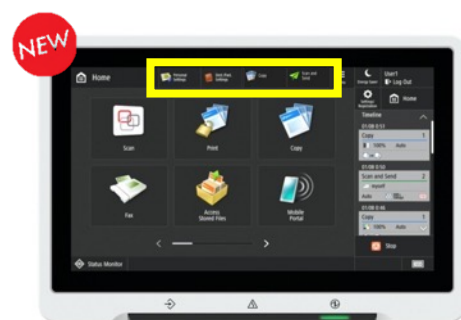

Soft-Keys

- Usability**

With the introduction of UFP v3.12, imageRUNNER ADVANCE devices support 4 Medium/Small-sized button layout and function shortcut keys for swift access to frequently used functions.

4 MS-sized button layout

Function Shortcuts

- Card Reader Placement**

Optional Card Reader controls access to the device and specific features when using a proximity card.

**Note:**

10 Card reader sold separately.

## KEY PRODUCT SALES POINTS

- **Intuitive User Interface**

10.1" WSVGA fully-flat adjustable tilt control panel with flick, pinch, and drag and drop operability\*. Soft-key user interface provides familiar smartphone like functionality with operational keypad built into the touchscreen UI.

- **Home Screen**

With the introduction of the imageRUNNER ADVANCE DX models, on screen soft-key support is now standard. The specifications of the local UI include timeline support and consolidated Main Menu and Quick Menu screens into one "Home" screen. The Home screen is comprised of Main Menu buttons and Timeline. Support for long presses for improved operability and customization for users and administrators.

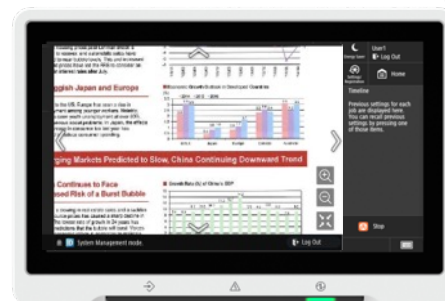

User Interface

Flick\*

Pinch

**Note:**

User interface feature Timeline, only available on III edition and DX models.

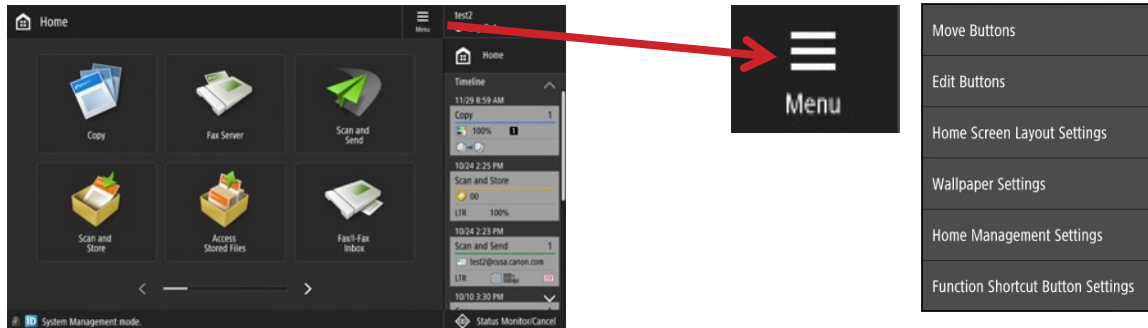

\*Flick is not available on the following screens: one touch menu, [Options] menu in Copy/Box/Send, Settings/Registration.

Pinch can be used on any menu or function screen. Default is off, and can be turned on in Settings/Registration → Preferences → Accessibility Settings → Enable Screen Magnification. Drag and Drop to rearrange the button layout in the Quick Menu. Toggle on-off in the bottom right corner.

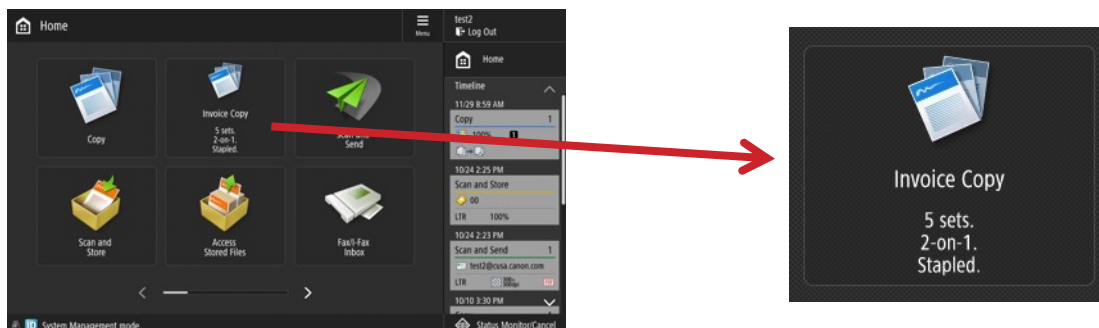

## KEY PRODUCT SALES POINTS

### Home Screen with Timeline

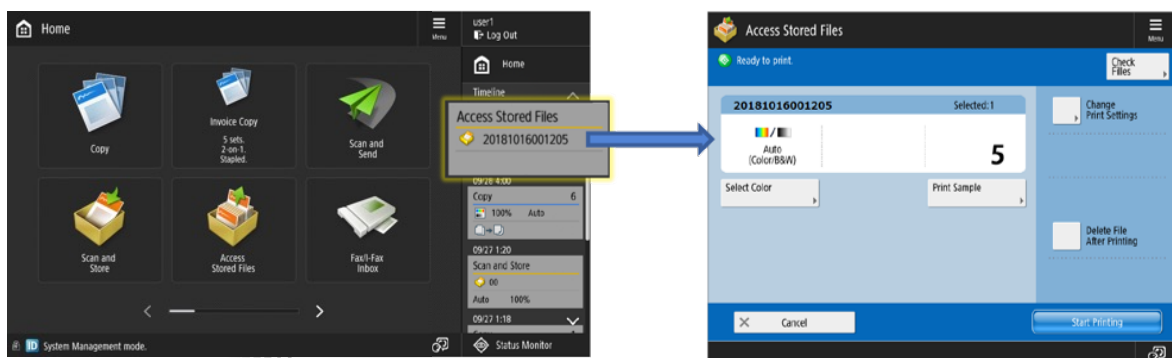

- Home Screen is an integrated menu, combining the Main Menu and Quick Menu to help provide users with increased workflow efficiency and personalization. Available with third generation imageRUNNER ADVANCE 3rd edition and DX models.
- The main menu gear icon is a collapsed menu icon, from which display settings related to the screen the user is currently on can be accessed.

- The Home screen consists of two sections – the integrated menu and the Timeline. The integrated menu includes the function buttons (Copy, Scan and Send, Access Stored Files, etc.) as well as Quick Buttons. Quick Buttons can either be Personal (integrating with My ADVANCE) or Shared and accessed directly from the Home Screen.

- Timeline allows you to easily recall 10 of the most previous jobs or functions (Copy, Scan and Send, Access and Stored Files\*). With the introduction of UFP v3.10, you can easily recall saved files from locations local to the device.\*\*

\*Access and Stored files available from UFP v3.10.

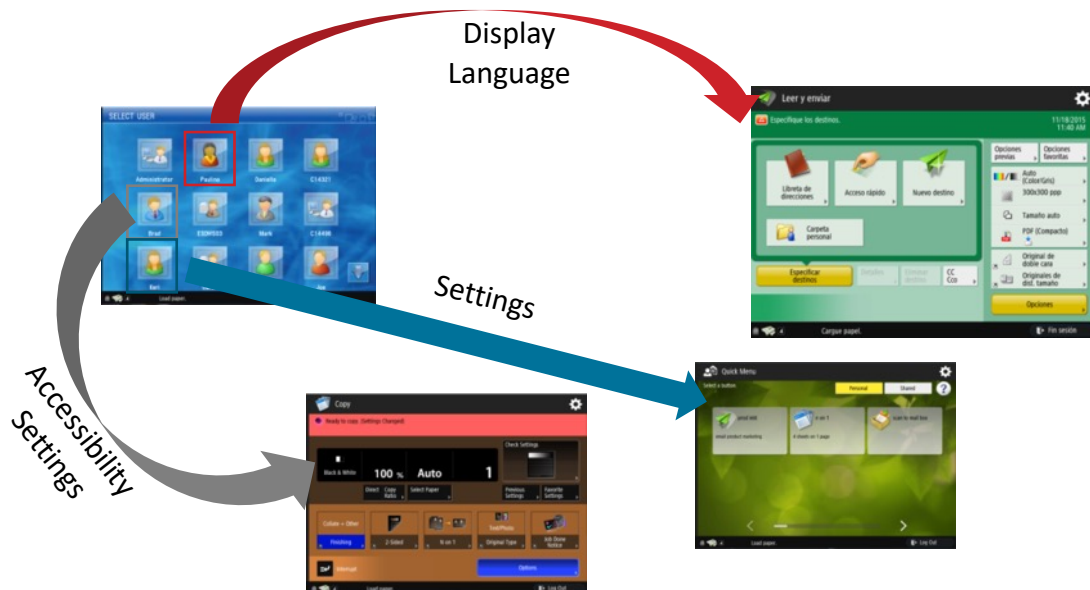

\*\*Limited to III edition and DX model devices.

## KEY PRODUCT SALES POINTS

### Advanced Personalization with My ADVANCE

My ADVANCE offers a personalized user experience at the device optimized for the workflow of each individual user when used with a log-in service, such as the standard Universal Login Manager solution. This feature provides the ability to customize displays, settings, and functions for individual users' preferences and workflows.

- **My Display:** Customize your display language, initial screen, and accessibility settings. Access your own job status and job history.
- **My Settings:** Improve efficiency with your personal default settings and previous settings. Access your own personal Quick Menu. Ease the log-in process with keychain authentication.
- **My Function:** Access your own personal address book and Secure Print jobs. Easily send to yourself or a personal folder.

User preferences set with My ADVANCE can be synchronized in real-time (up to 10 compatible devices) so that changes made to personal settings will be replicated across the specified Third Generation imageRUNNER ADVANCE and imageRUNNER ADVANCE DX devices.

For more information on My ADVANCE, including which settings can be customized by user, details on synchronization, and certain limitations, see the Third Generation imageRUNNER ADVANCE and imageRUNNER ADVANCE DX Platform Handbook.

## KEY PRODUCT SALES POINTS

### Automatic Document Feeder

#### Sleek Tray Design

**Black tray** for better paper visibility

**Flat top** for placing documents

#### Benefits:

- **FAST** for productivity
- **QUIET** for integration in environments that require little noise
- **SMART** technology for better user experience

### Scan Speed\*

up to **270 ipm**

**As fast as 4.5 sheets per second!**

(BW/Color, LTR, Duplex)

### ADF Paper Capacity (20 lb Bond)

**200** Sheets

**Note:** Card reader sold separately.

\* Examples based on typical settings, rated in pages/images per minute with letter-sized documents, [Insert landscape or portrait] feeding direction, up to [INSERT dpi] dpi. Actual processing speeds may vary based on PC performance and application software.

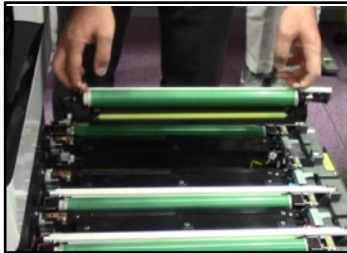

## KEY PRODUCT SALES POINTS

### Easy and Fast Replaceable Parts

Minimizing the need for tools and screws makes key parts fast and easy to replace.

- Compared to predecessor model

## KEY PRODUCT SALES POINTS

### Automatic Document Feeder

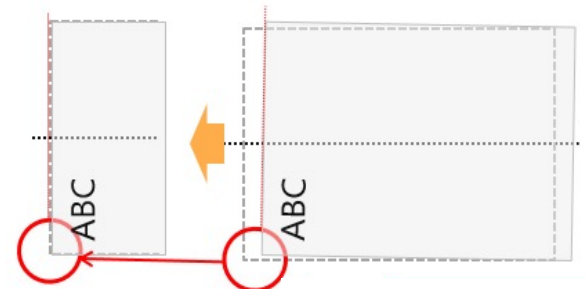

- Wide Range of Media Support**

The imageRUNNER ADVANCE DX C5800 Series supports additional media sizes through the ADF to expand support for documents such as receipts and checks. The Free Size setting allows for the accurate scanned file dimension size for these types of documents.

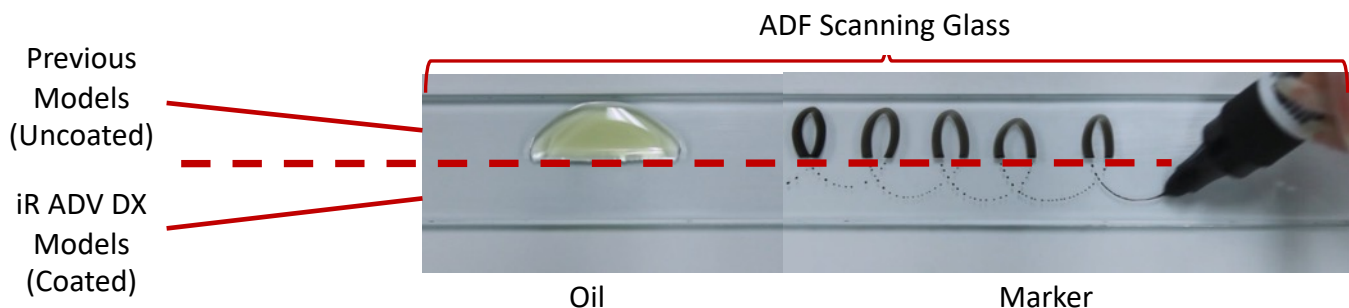

- Digital Skew Correction**

The imageRUNNER ADVANCE DX C5800 Series utilizes digital skew correction that helps increase scan accuracy and helps enable fast scan speeds.

- Stain-Resistant Coating for ADF Scanning Glass**

## KEY PRODUCT SALES POINTS

- Toner Specifications**

All models of the imageRUNNER ADVANCE DX C5800 Series use the same toner – GPR-61. This is a new toner being introduced with this series. The toner yields help provide high productivity, and efficiency.

imageRUNNER ADVANCE DX C5800 Series

	GPR-61	GPR-61L
Black	<u>71,000</u>	N/A
Cyan	<u>60,000</u>	26,000
Magenta	<u>60,000</u>	26,000
Yellow	<u>60,000</u>	26,000

### Common Toner = Reduce Stock Space, Easy Inventory Management

The imageRUNNER ADVANCE DX C5800 Series support a lower yield, or “L,” color toner. Possible uses for this toner include lowering the initial installation cost, decreasing the cost of the last toner bottles on a lease, and providing more flexibility for managing toner costs for low usage customers (low copy volume/low color usage).

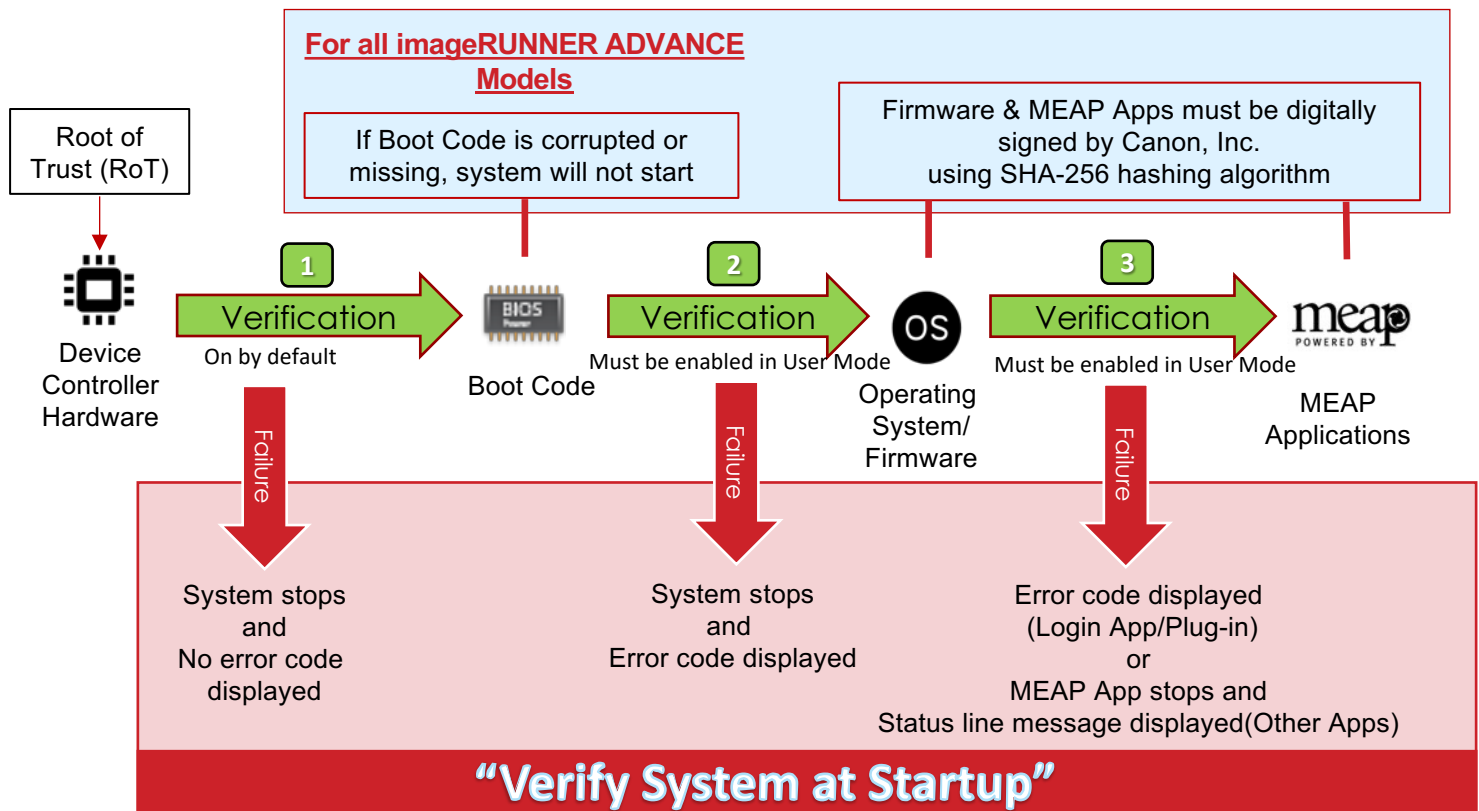

**Note:**

All yields are estimated at 5% coverage.

## KEY PRODUCT SALES POINTS

### Verify System at Startup

- Verify System at Startup is a process to help verify the validity of the device BIOS (Basic Input/Output System), firmware, and MEAP applications from unauthorized modifications.
- This functionality adds to that already provided by previous imageRUNNER ADVANCE models, which also include a number of security measures to help protect the integrity of the device, firmware, and MEAP applications

User Mode: Setting/Registration>Device Settings>Management Settings>Security Settings>Verify System at Startup

#### Note:

- Performed at every device reboot.
- This function is OFF by default. It can be turned on by an administrator in Settings/Registration.
- When activated, device warm-up time will increase by 20-40 seconds (depending on model). Recovery from Sleep mode is not affected.
- Error code will require a service call to remediate.
- Only available on imageRUNNER ADVANCE III edition and imageRUNNER ADVANCE DX models.

## KEY PRODUCT SALES POINTS

**McAfee Embedded Control™**

- While **[Verify System at Startup]** comes standard with all 3rd Edition and DX models (with Unified Firmware Platform v3.8 or later), UFP v3.9 introduced this additional layer of MFP security.
- McAfee Embedded Control is standard on all third generation imageRUNNER ADVANCE 3<sup>rd</sup> edition and imageRUNNER ADVANCE DX models from firmware v3.9.
- Designed to prevent malware execution and tampering of firmware and applications.
- With McAfee Embedded Control, all firmware and applications are checked against a whitelist that only allows approved firmware and applications determined by Canon to be executed. Helping to prevent unauthorized changes to the system. This whitelist is automatically updated with UFP updates as well as during updates/installations of individual MEAP applications.

- **Whitelisting** prohibits execution of unknown software by only allowing trusted firmware and applications to execute. Therefore, the whitelist function is able to help prevent an unknown malware launch, and mitigate zero-day attacks. Zero day attacks can exploit previously unknown vulnerabilities before they can be patched by the manufacturer.
- Denied unauthorized program tampering and unauthorized executions are recorded to the audit log, enabling administrators to check the device status through syslog and audit log functions.

**NOTE:**

This function is set to [OFF] by default

- In order to set this function to ON, [Verify System at Startup] also needs to be set to ON.
- When this function is set to ON, device startup will take slightly longer (does not affect sleep recovery/Quick Startup time).

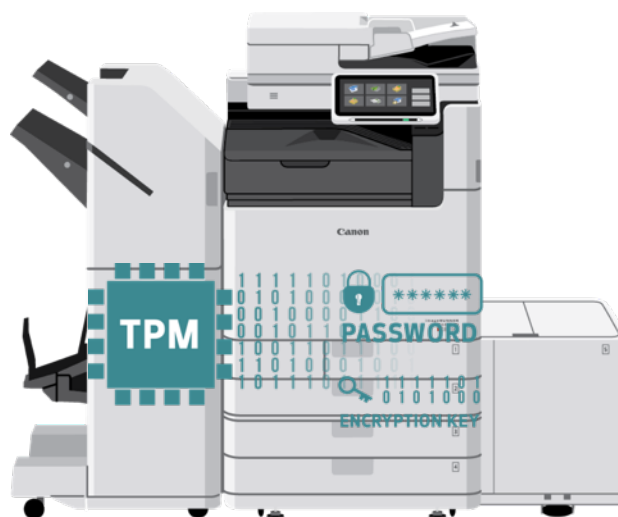

### Advanced Device Security

Our imageRUNNER ADVANCE DX devices are strong in the area of security with many standard security features designed to help protect data from various aspects of network, device, and document security.

### • **NEW** Trusted Platform Module(TPM) 2.0

TPM is a security chip that is responsible for encrypting and decrypting critical data such as passwords, certificates, and encryption keys. Compared to previous TPM, the TPM 2.0 will support stronger encryption technology that can help protect critical data in MFPs.

## KEY PRODUCT SALES POINTS

### Improved Speed and Durability with Solid-State Drive (SSD)

With the imageRUNNER ADVANCE DX C5800 Series, Solid-State Drive (SSD) will be replacing Hard Disk Drive (HDD) as the standard data storage.

- **Basic Information**

- Standard Storage of 256GB
- Additional Storage option - 250GB/1TB/Mirroring Kit available
- Delete per job and HDD Erase Scheduler are not supported with SSD

**Improved  
SPEED &  
DURABILITY  
with SSD**

- ✓ Exceptionally fast which provide quicker startup time
- ✓ More resilient; it is less likely for it to fail
- ✓ No moving parts making it vibration and shock-resistant
- ✓ Mean time before failure for SSD is approximately 3x longer than HDD reducing replacement costs.

- **SSD Data Control**

- Data writes in pages and groups data in blocks
- Limited writes per cell on SSD
- Process replaces the previous HDD Data Erase feature on predecessor models

#### TRIM Command

The engine OS sends a TRIM to mark the PAGE(s) of data that were deleted as Erased.

#### Garbage Collection

Process where the SSD moves valid PAGE(s) out the BLOCK to another BLOCK and wipes the BLOCK (Electrically Intensive)

- **Strong Security Protecting Data on SSD**

Password Lock	Data Encryption	Data Initialization
<ul style="list-style-type: none"> <li>• SSD is secured with a password designed to ensure that only that unit (and not a PC, for example) can read from or write to the drive</li> </ul>	<ul style="list-style-type: none"> <li>• AES-XTS 256-bit encryption – “strongest AES encryption standard”*</li> <li>• Canon MFP Security Chip complies with the FIPS 140-2 Level 2 (U.S. government standard)</li> </ul>	<ul style="list-style-type: none"> <li>• Overwrites the stored data at end of lease – Only needed to write all ‘0’ one time</li> </ul>

\* AES currently comes in 128-bit, 192-bit, and 256-bit implementations.

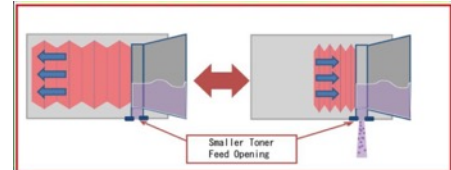

## KEY PRODUCT SALES POINTS

### Image Quality Highlights

#### IAP Toner Bottle

#### Stable Toner Supply

- The “Insulated & Air Pressure” Air Assist Method provides varied air pressure levels depending on the toner remaining in the bottle.
- Provides a stable toner supply, helping to contribute to outstanding image quality and consistency.

New

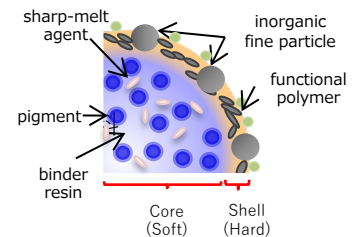

#### CS2 Toner

#### Quality on Rough Paper

#### Stable Color Quality

- Low-melting toner helps reduce electric power required for fixing.
- Results in fast print speeds and lower power consumption.
- Toner surface characteristics provide high transfer stability, helping to reduce irregularities and scattering.
- Durability, charging stability, and toner surface characteristics, combined with the image control abilities of the main unit, provides stable and consistent color output, even over long runs

Schematic cross-sectional view of toner

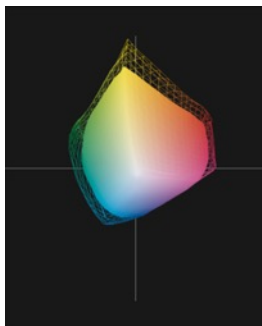

#### V<sup>2</sup> Color Profile

#### Vividness

#### Vibrance

- 20%\* Expanded color reproduction range (gamut) of the device
- Strong color reproduction in dark areas.
- Sharp clarity of documents, especially photos.
- Prints appear crisp and well-defined.

Solid : iR ADV C5200 Series  
Mesh: iR ADV C5500 Series

## KEY PRODUCT SALES POINTS

### • Paper Weight Support

The imageRUNNER ADVANCE DX C5800 Series support up to 110 lb. Cover (300 g/m<sup>2</sup>) from the multi-purpose tray and 16 lb bond to 140 lb cover (52 to 256 g/m<sup>2</sup>)

Up to 110 lb. Cover (300 g/m<sup>2</sup>)  
Multi-Purpose Tray

Up to 140 lb. Index (256 g/m<sup>2</sup>)  
Upper and lower cassettes

### • Fast Small Paper Printing

With the C5700 Series, overheating of the fixing film decreased the print speed for small paper. With the imageRUNNER ADVANCE DX C5800, the space between sheets is widened and fans are added for cooling. By preventing overheating of the fixing film, print speed does not decrease when a large amount of A5R/STMTR/B5R is outputted.

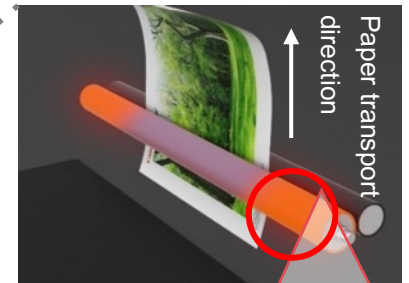

<b>B5</b>	70ppm
<b>B5R<sup>■</sup></b>	42ppm
<b>A5</b>	70ppm
<b>A5R<sup>■</sup></b>	70ppm
<b>STMTR<sup>*</sup></b>	60ppm <small>*STMTR is supported manual feed only (60 ppm)</small>
<b>STMTR<sup>■</sup></b>	70ppm

■ The higher speed is the rating for 90 g/m<sup>2</sup> paper in an operating environment of 73.4 degrees F (23 degrees C) and 50% humidity. Productivity may decrease when the temperature decreases below 73.4 F (23 C) or when the paper weight is above 90 g/m<sup>2</sup>.

**Note:** Speeds shown for 70ppm models

IR ADV DX  
C5700 Series

Previously, the edges were not cooled by the fan and did not dissipate heat because they did not pass through the paper.

## KEY PRODUCT SALES POINTS

- **Expanded Support for Mobile Workflows**

The imageRUNNER ADVANCE DX product line, as well as all third generation imageRUNNER ADVANCE models, support Apple AirPrint®, and Mopria®. With the standard Mobile Portal, these models are fully compatible with the Canon PRINT Business app. For more information, see the Third Generation imageRUNNER ADVANCE and imageRUNNER ADVANCE DX Platform Handbook.

- **Motion Sensor**

The main unit includes a motion sensor designed to reduce the perceived waiting time for the device to recover from sleep mode. The device is able to detect an approaching user, intelligently predict the user's intent, and recover from sleep mode accordingly. Likewise, the device can predict when the user is finished using the device and returns to sleep mode. Four sensitivity settings are available to suit varying operating environments and, if preferred, the motion sensor sleep trigger can be turned off entirely allowing the device to transition to and from sleep mode like predecessor models.

## KEY PRODUCT SALES POINTS

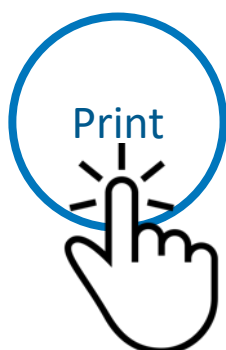

### Canon PRINT Business App

imageRUNNER  
ADVANCE DX

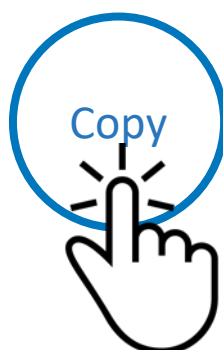

- **Remote Operation**

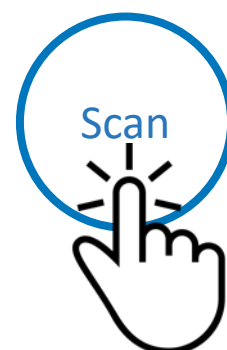

This feature allows users to controls the imageRUNNER ADVANCE user interface from a compatible smartphones or tablet without having to touch the control panel. With the goal of working more efficiently and safely, customers are looking for ways to continue leveraging their office multifunction printers while, at the same time, minimizing touchpoints.

Print from your mobile device and supported cloud storage locations.\*

Use the Remote Operation feature to copy documents without touching the MFP control panel.

Scan and Send to your mobile device and store in supported cloud storage locations.\*

## PRODUCT DESIGN HIGHLIGHTS

- **Easy to Use Paper Cassettes with Soft Close Drawers**

The imageRUNNER ADVANCE DX C5800 Series, paper cassettes feature a handle – requiring only a simple pull motion to open. Changing paper is simple with easy-to-use guides. The device automatically recognizes the size of the loaded paper making changing paper stocks simple and easy. The paper cassettes also feature soft close drawers to help prevent noisy operation and slamming.

- **Standard Envelope Support**

The Multi-Purpose Tray, Upper Cassette and Lower Cassettes\* all come standard with envelope support. The design tray design and the use of the envelope attachment makes for simple user installation. These features help to provide more efficient envelope utilization.

\*Envelope Feeder Attachment A (standard) is required.

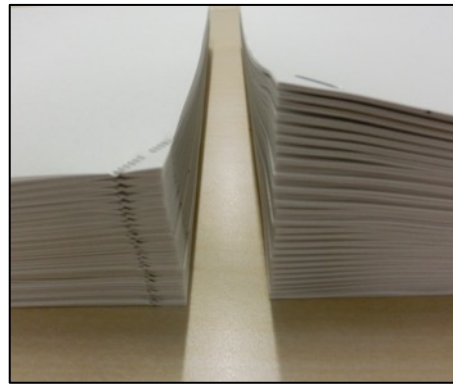

## PRODUCT DESIGN HIGHLIGHTS

- Staple-free Stapling and Staple On Demand with All Optional Finishers**

These helpful features are available with the optional Inner Finisher-L1, Staple Finisher-AB1, and Booklet Finisher-AB1. Staple-free Stapling binds the paper together with pressure and not the use of metal staples. This helps decrease consumables usage and makes it easier for users to separate their originals. In addition, Staple-free Stapling makes for better, more compact document stacking. While up to 10 sheets can be bound with 17 lb. Bond paper, the more common 20 lb. Bond paper can bind up to 8 sheets using this method – selected either from the print driver or the copy screen finishing options menu.

*Sample Output*

*Stacking Comparison*

Staple On Demand provides a convenience stapler as part of the finisher. This is helpful for re-stapling sets of originals that were unbound in order to feed through the ADF. It is also handy for when the user forgets to choose the staple option from the print driver or copy screen. Staple On Demand supports stapling up to 40 sheets with the Inner Finisher and up to 50 sheets with either External Finisher.

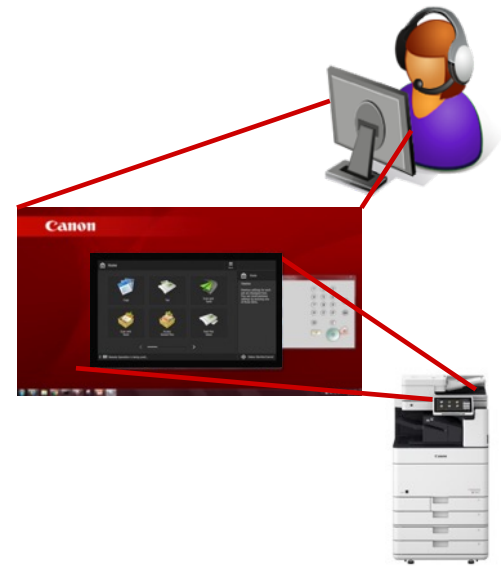

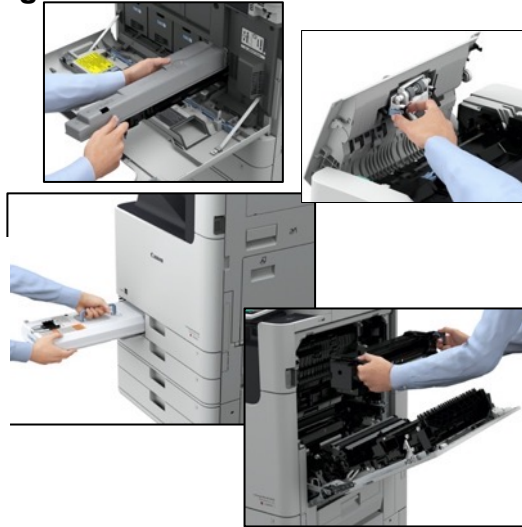

*Staple On Demand with Inner Finisher*

*Staple On Demand with External Finisher*

## PRODUCT DESIGN HIGHLIGHTS

### Easy Maintenance Design

### Installation Aspects

- Compact and lightweight (for the class)
- Fast main unit installation: About 10 minutes or less
- No tools required for installation
- Easy on-screen setup wizard
- Pre-configured with
  - ADF
  - UFR II / PCL 6 / PS 3

### Servicing Aspects

- Easy maintenance
- Longer life parts
- User-replaceable parts\*
  - Fusing Unit
  - ADF Rollers
  - Drum
  - ITB\*\*
- Device UI Animations and Videos

### Diagnostic Aspects

- Standard Remote Operations Software Kit
- See device operation
- Troubleshoot issues proactively

### Installation Benefits

- Fast customer delivery
  - Especially for fleets
- Less time for dealer setup
  - PDLs installed
  - ADF installed
  - Near tool-less
- Potential installation by trained delivery person
- Potential for trained customer setup

### Servicing Benefits

- Fast servicing times
- Designed to provide more customer uptime!
- On-screen videos guide customers
- Trained customers can replace key items
- Good for remote locations, large fleets
- Potential for faster resolution

### Diagnostic Benefits

- See actual customer UI
- Helps diagnose issues remotely
- Helps speed up resolution
- Beneficial to customer help desks
- Training aid
- Resolve some issues without on-site visit
- Helps return device to service fast

\* Customer replacement of key parts is at dealer's discretion.

\*\* Requires additional guidance

## imageRUNNER ADVANCE VALUE PILLARS

### Workflow Efficiency

Designed to help save time and resources and increase productivity with efficient workflows and intuitive ease-of-use

### Cost Management

Identify and address areas for better management of print- and document-related costs

### Security

A range of standard and optional security capabilities to help protect sensitive information

### Device & Fleet Management

Advanced capabilities for efficient fleet management to help ease IT burden and maximize productivity

### Quality & Reliability

Outstanding quality and reliable performance to keep environments moving

### Sustainability

Incorporating responsible design and efficient operation to help achieve environmental goals

For more information on the imageRUNNER ADVANCE value pillars and platform, see the “Third Generation imageRUNNER ADVANCE and imageRUNNER ADVANCE DX Platform Handbook”.

# Configurations and Accessories

## Optional Finishing Accessories

### Staple Finisher-AB1

- 2-tray, 3,250-sheet capacity
- Corner and double stapling up to 50 sheets
- Supports Staple-free Stapling and Staple On Demand
- Supports optional internal 2/3-hole puncher (2/3 Hole Puncher Unit-A1)
- Requires Buffer Pass Unit- P1

### Booklet Finisher-AB1

- 2-tray, 3,250-sheet capacity
- Corner and double stapling up to 50 sheets
- Booklet-making up to 20 sheets and saddle-folding up to 3 sheets
- Supports Staple-free Stapling and Staple On Demand
- Supports optional internal 2/3-hole puncher (2/3 Hole Puncher Unit-A1)
- Requires Buffer Pass Unit- P1

### Inner Finisher-L1\*

- 2-tray, 545-sheet capacity
- Corner and double stapling up to 50 sheets within the footprint of the main unit
- Supports Staple-free Stapling and Staple On Demand
- Supports optional internal 2/3-hole puncher (Inner 2/3 Hole Puncher-D1)

### Buffer Pass Unit-P1

- Required for Staple Finisher-AB1 and Booklet Finisher-AB1

### Inner 2way Tray-M1

### 1<sup>ST</sup> Copy Tray Kit-A1\*\*

### 3<sup>rd</sup> Copy Tray Kit-A1

imageRUNNER  
ADVANCE DX

## Optional Paper Handling Accessories

### Cassette Feeding Unit-AQ1

- Two 550-sheet cassettes
- Supports up to 12" x 18"
- Supports 14 lb. Bond to 140 lb. Index

### High Capacity Cassette Feeding Unit-C1

- 2,450-sheet capacity
- Supports LTR
- Supports 14 lb. Bond to 140 lb. Index

### Paper Deck Unit-F1

- 2,700-sheet capacity
- Supports LTR
- Supports 14 lb. Bond to 140 lb. Index

### Cabinet Type-V

\* Inner Finisher-L1 not available on imageRUNNER ADVANCE DX C5870i.

\*\* Required when Inner Finisher-L1, Staple Finisher-AB1 or Booklet Finisher-AB1 is not installed

\*1: The higher speed is the rating for 90 g/m<sup>2</sup> paper in an operating environment of 73.4 degrees F (23 degrees C) and 50% humidity. Productivity may decrease when the temperature decreases below 73.4 F (23 C) or when the paper weight is above 90 g/m<sup>2</sup>.

\*1: The higher speed is the rating for 90 g/m<sup>2</sup> paper in an operating environment of 73.4 degrees F (23 degrees C) and 50% humidity. Productivity may decrease when the temperature decreases below 73.4 F (23 C) or when the paper weight is above 90 g/m<sup>2</sup>.
