

PRODUCT DATA SHEET

A New Approach

PENETRANT

March 2021

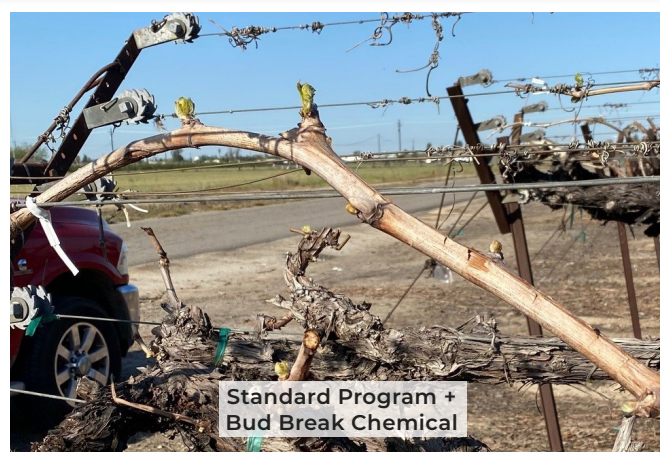

KEY TAKEAWAYS

The images **above** show PureCrop1 as the penetrant for an herbicide (*right*) compared to three traditional adjuvants (*left*) with the same herbicide. The results are shown after 8 and 48 hours.

The images **below** show PureCrop1's effectiveness as a penetrant when combined with a bud break product, this plot was evaluated side-by-side with the grower's standard penetrant.

STUDY DATA | THE PURE RESULTS

DILUTION RECOMMENDATION

We recommend using PureCrop1 at 0.25% - 0.5% v/v as a penetrant

*Frequency and dilution rates depend on the variation in crops, growing methods, climate, and geography. Adjust your IPM process based on your specific needs.
