

## LBN-FC: Order Tracking

SAP TM Freight Orders (also Bookings from Q1 2022) are tracked based on a fixed set of standard milestones, e.g., Departure, Arrival, along with current geolocation and ETA information.

### Milestones are reported:

- 
- By carriers using the LBN FC Carrier portal
- Posted automatically with out-of-the-box visibility provider integration, e.g., project44, Fourkites etc
- Using project-based API/EDI connectivity

Milestone tracking only for SAP TM execution documents.

Adding project-specific milestones is on the SAP LBN FC roadmap.

Supports only basic and advanced SAP TM (FO and FB)

### Public Cloud Service

- **Standard mode-specific milestones**
  - Departure
  - Arrival
  - ETA
- Non-extensible (as of Q1 2022)

## LBN-GTT

Generic tool available for SAP TM Freight Order/Booking or Freight unit-level tracking. Standard and template apps are provided with a pre-configured, extensible set of milestones.

### Pre-configured App Name: Track Shipments

Apart from SAP TM, GTT also supports the other SAP/non-SAP application systems, e.g., SAP ECC, S/4HANA, LE-TRA, EWM. This means that GTT is a generic Track and Trace tool that can be used for transportation milestone tracking as well as process tracking. (Similar capability as SAP Event Management)

e.g., for Purchase Order tracking, SAP provides a preconfigured model/app which can track the entire procurement process starting from PO creation to payment along with inbound transportation tracking.

### SAP GTT provided apps/templates include:

- Track Shipments (for TM FO/FB, LE-Shipment)
- Track PO Fulfillment
- Track SO Fulfillment

These templates can be further enhanced to add custom process and transportation milestones, making GTT a more generic and comprehensive track and trace tool.

### Generic Track and trace solution Supports

- SAP TM (basic and advanced)
- SAP ECC
- S/4HANA
- LE-TRA
- SAP EWM

### Owner Managed space in the cloud

- Ready to use tracking app templates
- Configurable and extensible setup
- Add custom milestones
- Transportation Milestone tracking
- Transportation milestone tracking
- Purchase Order fulfillment tracking
- Sales Order fulfillment tracking
