The Smart Track App is an Event Management Solution that helps track shipments in real-time. The Novigo Smart Track App lets you know the exact location of your shipment and status with real-time reporting of events across the supply chain. It is a FIORI-based app that can be used on any smart device.

Smart Track App for enhanced Supply Chain Visibility

Simplify Access & Use	Geolocation	Embrace Digital transformation	Reconciliation
• A user-friendly & elegant **user interface** • **Customizable** based on user role	• Reduce out-of-route mileage, costs & time taken • **Live tracking** with Geospatial location data • Truck **fleet optimization**	• Eliminate **manual processes** & reduce error • Facilitate **shift** from Legacy/EDI systems • Enable **partners** to use the app securely	• Faster dispute resolution for damaged deliveries • Avoid information loss through paperless record-keeping

The Fiori App: Novigo add-ons

Filtering of Freight Orders
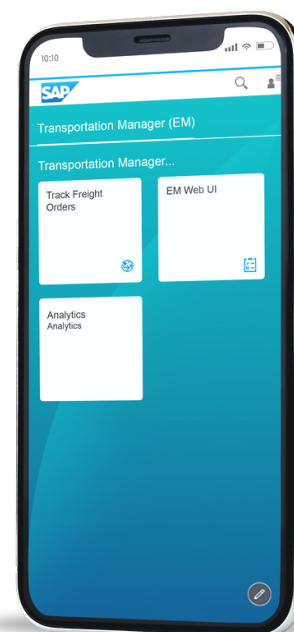

Reporting events with geo-location information

Capturing of unexpected events with pictures

Generate / Scan QR Code

Proof of delivery signature on glass

Novigo

Your Supply Chain Innovation Partner

With the Novigo Smart Track App you get

Real-time Shipment Status
Real-time tracking and status of the execution of shipments

Enhanced info on optimized routes
Display stops of optimized routes from TM

Accurate Geospatial data
Integration with Google Maps™

Enhanced User Experience
User-friendly interface

Smart device compatibility
Access execution visibility data with convenience anywhere and anytime

In a multi-tier supply chain, it is complicated to aggregate status information seamlessly, from all the stakeholders involved, to achieve end-to-end visibility.

The challenges to acquiring reliable and accurate shipment visibility data is prevalent across multiple touchpoints in a supply chain from the shipper to driver actually moving the shipment to the use of complex data aggregation systems and existing reconciliations processes.

The Innovative Solution

The Smart Track App is a smart device app that is convenient and accessible to every user throughout the supply chain. It allows all users to report the status of planned milestones, in a simple and easy way. This revolutionary app can leverage the smart device features fully integrated with the native application and makes geolocation, signature, and picture capturing seamless and simple.
